

Problem Statement number	Title	Technology Used	SDG Mapping	Project Description
PRJ_1	Multilingual Voice-Based Grievance Filing for Illiterate Citizens	Whisper ASR, IndicNLP, FastAPI, Flutter, MySQL	SDG 10, SDG 16	Millions of rural Indian citizens cannot read/write and are excluded from digital grievance systems. Build a voice-first app where users speak in their regional language (Hindi, Bhojpuri, Tamil, etc.), the system transcribes, translates, categorizes, and files the complaint automatically to the right government department.
PRJ_2	Real-Time Adulteration Detection in Milk Using IoT Spectroscopy	ESP32, NIR Sensor, ML, FastAPI, Flutter	SDG 2, SDG 3	Milk adulteration (water, starch, urea) causes massive health issues in rural India. Existing lab tests take days. Build a low-cost IoT device using NIR/optical sensors that detects adulterants in milk within seconds at the collection point, with ML-based classification and farmer-facing mobile alerts.
PRJ_3	Automated Groundwater Level Prediction for Indian Villages	IoT Depth Sensors, LSTM, FastAPI, React, Weather API	SDG 6, SDG 2	Over 600 million Indians face water scarcity. Groundwater levels are measured manually and irregularly. Build a sensor-based groundwater monitoring network combined with LSTM time-series prediction to forecast water table depletion weeks in advance, enabling villages to plan irrigation and rationing.
PRJ_4	AI-Based Fake Government Scheme Website Detector	Python, NLP, ML, Chrome Extension, FastAPI	SDG 16, SDG 1	Thousands of fraudulent websites impersonate PM Kisan, MNREGA, and other government schemes, stealing money from rural beneficiaries. Build a browser extension + ML model that detects fake government scheme URLs in real time using NLP on page content, URL patterns, and visual similarity to official sites.
PRJ_5	First-Generation College Student Academic Support System	Python, NLP, FastAPI, Flutter, LLM	SDG 4, SDG 10	First-generation college students in India lack family guidance on careers, exams, scholarships, and academic processes. Build an AI companion that understands their academic context, answers queries in Hindi/English, recommends scholarships, alerts on deadlines, and provides step-by-step guidance through bureaucratic processes.
PRJ_6	Counterfeit Pesticide Detection Platform for Farmers	React, FastAPI, ML, Computer Vision, QR/NFC	SDG 2, SDG 12	Over 30% of pesticides sold in rural India are counterfeit, destroying crops. Build a mobile app where farmers scan the pesticide packet barcode/QR, and the system cross-verifies with a blockchain registry, analyzes label consistency with CV, and flags fakes — protecting both crops and farmer investments.
PRJ_7	Real-Time Landslide Early Warning System for Hilly Regions	ESP32, Vibration Sensor, Tilt Sensor, LoRa, ML, SMS Gateway	SDG 11, SDG 13	Landslides in Northeast India, Himachal, and Uttarakhand kill hundreds yearly with little warning. Build a distributed IoT sensor network on hillsides detecting soil movement, moisture saturation, and vibration anomalies. Use ML to predict landslide probability and automatically trigger SMS/siren alerts to nearby villages.
PRJ_8	Automated MSME GST Reconciliation and Anomaly Detector	Python, FastAPI, React, GST API, ML	SDG 8, SDG 16	Small businesses spend 30+ hours/month on GST reconciliation. Mismatches between GSTR-1, GSTR-2A, and GSTR-3B are manual and error-prone. Build a tool that auto-fetches GST returns via API, reconciles across forms, flags mismatches with root cause analysis, and suggests correction entries.
PRJ_9	Road Accident Black Spot Prediction Using Historical + Live Data	Python, ML, GIS, FastAPI, React, OpenStreetMap	SDG 3, SDG 11	India has the world's highest road accident deaths. Authorities lack tools to proactively identify dangerous stretches before accidents cluster. Build a system combining historical accident records, road geometry, weather data, and traffic density to predict high-risk black spots and recommend infrastructure interventions.
PRJ_10	Automated Court Case Status Tracker and Hearing Reminder	Python, Web Scraping, FastAPI, Flutter, NLP	SDG 16, SDG 10	India has 40 million+ pending court cases. Litigants and lawyers miss hearings because case status updates are buried in government portals. Build a system that scrapes eCourts data, tracks case status changes, sends proactive hearing reminders, and uses NLP to summarize case orders in plain language.
PRJ_11	Soil Nutrient Deficiency Mapper Using Drone Multispectral Imaging	Drone, Multispectral Camera, Python, NDVI, React GIS	SDG 2, SDG 15	Farmers apply fertilizers uniformly across fields, wasting resources and damaging soil health. Build a drone-based system that captures multispectral images, computes vegetation indices (NDVI, NDRE), maps nutrient deficiencies zone-by-zone, and generates variable-rate fertilizer application maps for precision farming.
PRJ_12	Livestock Disease Outbreak Prediction System	Python, ML, FastAPI, Flutter, SMS Gateway	SDG 2, SDG 3	Livestock epidemics (FMD, PPR) wipe out farmer incomes with no early warning. Build a system that aggregates disease reports from veterinary centers, weather data, and animal movement patterns to predict outbreak hotspots using ML, alerting veterinary departments and farmers days before spread.
PRJ_13	Post-Harvest Crop Loss Reduction via Smart Storage Monitoring	ESP32, DHT22, Gas Sensor, ML, FastAPI, Flutter	SDG 2, SDG 12	India loses 15-20% of produce post-harvest due to improper storage conditions. Build an IoT system for grain/vegetable storage that continuously monitors temperature, humidity, CO2, and ethylene levels, predicts spoilage onset using ML, and alerts farmers to take corrective action before losses occur.
PRJ_14	Farmer-to-Consumer Dynamic Pricing Engine for Perishables	Python, ML, FastAPI, React, Market Price APIs	SDG 2, SDG 8	Farmers are forced to sell perishables at distress prices due to lack of demand visibility. Build a dynamic pricing engine that analyzes local market prices, weather (affecting supply), and consumer demand patterns to recommend optimal selling prices and timing for farmers via a simple SMS/app interface.
PRJ_15	Crop Insurance Claim Verification Using Satellite Imagery	Python, Sentinel-2 API, ML, FastAPI, React	SDG 2, SDG 1	Fraudulent and delayed crop insurance claims cost the Indian government billions. Genuine farmers wait months for verification. Build a system that automatically verifies crop damage claims using pre/post-disaster satellite imagery comparison, ML-based damage assessment, and generates evidence reports for fast-track settlement.
PRJ_16	Autonomous Perimeter Intrusion Detection Using Acoustic Sensors	ESP32, MEMS Microphone, DSP, ML, MQTT, React	SDG 16, SDG 9	Existing perimeter security relies on cameras that fail in darkness/fog. Build an acoustic-based intrusion detection system using an array of MEMS microphones and DSP/ML to classify sounds (footsteps, vehicle engines, glass breaking) in real time, distinguishing threats from ambient noise without visual input.
PRJ_17	Real-Time Radar Cross Section Estimator for UAV Classification	Python, Signal Processing, ML, FastAPI, React Dashboard	SDG 9, SDG 16	Drone threats near airports and military zones are increasing. Existing radar systems cannot reliably classify small UAVs vs birds. Build a signal processing + ML pipeline that analyzes radar return signatures in real time to classify UAV types, estimate their RCS, and trigger threat-level alerts.
PRJ_18	Predictive Failure Detection for Military Vehicle Electronics	CAN Bus, Python, ML, FastAPI, Embedded C	SDG 9, SDG 16	Military vehicle electronics fail unpredictably in field conditions, causing mission failures. Build a system that reads CAN bus telemetry from vehicle electronics in real time, applies ML anomaly detection to identify pre-failure patterns, and alerts maintenance crews before breakdown occurs.
PRJ_19	Battlefield Casualty Triage Optimization Using AI	Python, ML, FastAPI, Flutter, Medical Sensor Data	SDG 3, SDG 16	In mass casualty events, triage decisions under pressure lead to preventable deaths. Build an AI-assisted triage system that ingests vital signs from wearable sensors on casualties, prioritizes treatment order using ML-based severity scoring, and guides medics through optimal care sequences under resource constraints.
PRJ_20	Anti-Drone Geofencing Alert System for Critical Infrastructure	Python, ADS-B, RF Detection, FastAPI, React, Map API	SDG 9, SDG 16	Unauthorized drones near power plants, airports, and military bases are a growing threat. Build a multi-sensor drone detection system combining ADS-B monitoring and RF fingerprinting to identify unauthorized drones entering restricted geofences, logging flight paths and triggering tiered alerts to security personnel.
PRJ_21	Postpartum Depression Early Detection via Speech Pattern Analysis	Python, Librosa, ML, Flutter, FastAPI	SDG 3, SDG 5	Postpartum depression affects 1 in 5 mothers but goes undetected in 50%+ of cases in India due to stigma and lack of screening. Build a mobile app that passively analyzes daily voice samples for acoustic markers (pitch variability, speech rate, pauses) correlated with depression, flagging at-risk mothers for clinical follow-up.
PRJ_22	Automated Diabetic Retinopathy Screening for Rural Eye Camps	Python, CNN, TensorFlow, FastAPI, Flutter, Fundus Camera	SDG 3, SDG 10	Diabetic retinopathy causes blindness in millions but requires ophthalmologists to screen retinal images — scarce in rural India. Build a portable fundus camera-connected AI system that automatically grades retinal images for retinopathy severity, enabling trained non-specialist health workers to conduct screenings.
PRJ_23	Drug-Drug Interaction Checker for Polypharmacy Patients	Python, NLP, Drug Database, FastAPI, Flutter	SDG 3, SDG 9	Elderly patients often take 5-10 drugs simultaneously. Dangerous drug interactions go undetected at pharmacies. Build a system where pharmacists scan or input prescriptions, and an NLP + pharmacological knowledge graph engine flags potentially dangerous interactions with severity levels and alternative suggestions.
PRJ_24	AI-Based Tele-Dermatology for Rural ASHA Workers	Python, CNN, FastAPI, Flutter, WhatsApp API	SDG 3, SDG 10	Rural ASHA workers encounter common skin conditions daily but lack diagnostic tools. Build a WhatsApp-integrated AI tool where ASHA workers send photos of skin conditions, and a CNN model provides differential diagnosis, treatment protocol, and escalation guidance — all through a familiar interface without needing a dedicated app.
PRJ_25	Neonatal Jaundice Severity Estimation Using Smartphone Camera	Python, Computer Vision, ML, Flutter	SDG 3, SDG 10	Neonatal jaundice affects 60%+ of newborns. Current bilirubin measurement requires blood tests or expensive transcutaneous devices. Build a smartphone app that estimates jaundice severity from photos of the baby's skin/eyes using color analysis and ML calibrated against clinical bilirubin values for use in homes and rural clinics.
PRJ_26	Illegal Sand Mining Detection Using River Satellite Monitoring	Python, Sentinel-2, Change Detection ML, FastAPI, React GIS	SDG 14, SDG 15	Illegal sand mining devastates riverbeds across India but enforcement agencies lack monitoring tools. Build a system that performs automated change detection on weekly satellite imagery of riverbanks, flags suspicious excavation activity using ML, and generates geo-tagged evidence reports for enforcement authorities.
PRJ_27	Urban Heat Island Mapping and Cool Spot Recommender	Python, Landsat, QGIS, FastAPI, React, GIS	SDG 11, SDG 13	Cities like Bangalore experience extreme localized heat due to urban heat islands, but city planners lack micro-level heat maps. Build a system using Landsat thermal imagery to generate block-level urban heat maps, identify cool corridors, and recommend green cover, water body, and reflective surface interventions.
PRJ_28	Microplastic Pollution Tracking in Urban Water Bodies	Python, Computer Vision, IoT, FastAPI, React GIS	SDG 6, SDG 14	Microplastic contamination in urban lakes and rivers is invisible to existing monitoring systems. Build a low-cost automated water sampler with computer vision-based microplastic counting, geo-tagged pollution mapping, and trend analysis to identify pollution sources and guide remediation efforts.
PRJ_29	Stubble Burning Prediction and Alternative Incentive Platform	Python, Satellite API, ML, FastAPI, React, Payment Gateway	SDG 13, SDG 2	Stubble burning in Punjab/Haryana causes catastrophic air pollution across North India every winter. Farmers burn because alternatives are costly. Build a system predicting high-risk burning windows using crop calendar + weather ML, combined with a platform connecting farmers to stubble buyers and government incentive disbursement.
PRJ_30	Ocean Plastic Accumulation Zone Prediction Model	Python, Ocean Current Data, ML, FastAPI, React GIS	SDG 14, SDG 13	Plastic pollution accumulates in ocean gyres but prediction models are inaccessible to local coastal governments. Build a simulation system using ocean current data, wind patterns, and plastic source locations to predict where marine plastic accumulates seasonally, enabling targeted cleanup expeditions.

PRJ_31	Pothole Severity Auto-Detection and Repair Priority System	Python, YOLO, Accelerometer, FastAPI, React GIS, Mobile	SDG 11, SDG 9	Municipal corporations lack objective data on road conditions across thousands of kilometers. Manual surveys are slow and biased. Build a system using crowdsourced smartphone accelerometer data + optional camera feeds to auto-detect pothole locations, classify severity, geo-tag them, and generate priority repair work orders.
PRJ_32	Unauthorized Construction Detection Using Satellite Time-Series	Python, Sentinel-2, Change Detection ML, FastAPI, React GIS	SDG 11, SDG 16	Illegal constructions in urban and forest areas violate regulations but go undetected for months. Build an automated satellite monitoring system that performs bi-weekly change detection on urban zones, identifies new construction footprints, cross-checks with building permit databases, and flags unauthorized activity.
PRJ_33	Smart Stormwater Overflow Prediction for Urban Flooding	IoT, ESP32, Rainfall Sensor, LSTM, FastAPI, React	SDG 11, SDG 13	Urban flooding in Indian cities (Bangalore, Chennai, Mumbai) causes billions in losses annually. Existing drainage systems have no real-time monitoring. Build a sensor network measuring stormwater drain fill levels combined with LSTM rainfall prediction to forecast overflow events 2-3 hours in advance, enabling preemptive traffic rerouting and evacuation.
PRJ_34	Real-Time Noise Pollution Mapping for Urban Planning	ESP32, MEMS Mic, FastAPI, React GIS, ML	SDG 11, SDG 3	Urban noise pollution causes hearing loss, hypertension, and sleep disorders, but cities have almost no real-time noise monitoring infrastructure. Build a low-cost distributed acoustic monitoring network that maps noise levels across city zones in real time, identifies chronic hotspots, and feeds data into urban planning decisions.
PRJ_35	Automated Encroachment Detection on Railway Tracks	Python, YOLO, Drone/CCTV, FastAPI, React GIS	SDG 11, SDG 9	Encroachments on railway land near tracks cause derailments and accidents in India. Manual inspection of thousands of kilometers is infeasible. Build an AI system that processes drone imagery or CCTV feeds along tracks using object detection to identify encroachments, vegetation overgrowth, and unauthorized structures.
PRJ_36	Informal Worker Income Verification for Micro-Loan Eligibility	Python, ML, FastAPI, Flutter, UPI Transaction Analysis	SDG 1, SDG 8	Daily wage workers, street vendors, and gig workers cannot access formal credit because banks require salary slips. Build an alternative credit scoring system analyzing UPI transaction history, mobile recharge patterns, and behavioral signals to generate a creditworthiness score for informal workers without traditional income proof.
PRJ_37	Cooperative Society Loan Management with Fraud Detection	React, FastAPI, MySQL, Python ML, PDF Reports	SDG 1, SDG 16	Rural cooperative societies manage thousands of small loans manually using registers, leading to fraud, accounting errors, and member exploitation. Build a digital loan management system with member profiles, repayment tracking, interest calculation, and ML-based fraud detection flagging unusual patterns.
PRJ_38	Insurance Premium Fairness Analyzer for Low-Income Households	Python, ML, FastAPI, React, Insurance Policy APIs	SDG 1, SDG 10	Low-income households are often sold overpriced or unsuitable insurance products by agents. Build a tool that analyzes an individual's risk profile and compares available insurance products across providers to recommend the most cost-effective coverage, with plain-language explanation of terms in regional languages.
PRJ_39	Gig Worker Tax and Compliance Automation Tool	React, FastAPI, Python, GST API, MySQL	SDG 8, SDG 16	India has 15M+ gig workers (Swiggy, Ola, Upwork freelancers) who struggle with income tax filing, GST registration, and TDS reconciliation. Build an automated tool that aggregates income from multiple gig platforms via APIs, calculates tax liability, generates ITR-ready data, and files returns with minimal user input.
PRJ_40	Predatory Lending Rate Detection in Microfinance	Python, NLP, ML, FastAPI, React	SDG 1, SDG 10	Predatory microfinance lenders trap rural borrowers with hidden fees and deceptive interest calculations. Build a tool where borrowers photograph or input loan agreement terms, and NLP + financial analysis flags unfair clauses, calculates true APR, and compares against RBI-regulated benchmarks.
PRJ_41	Dropout Risk Prediction for First-Generation Students in Rural Schools	Python, ML, FastAPI, React, SMS Gateway	SDG 4, SDG 10	School dropout rates remain high in rural India despite mid-day meal schemes. Schools have no predictive system. Build an ML model trained on attendance patterns, assessment scores, socioeconomic indicators, and family data to predict which students are at high dropout risk weeks in advance, enabling targeted intervention by teachers and NGOs.
PRJ_42	Vernacular Language STEM Teaching Assistant	Python, LLM, IndicNLP, FastAPI, Flutter	SDG 4, SDG 10	STEM education in India is delivered primarily in English, creating a comprehension barrier for students in regional-medium schools. Build an AI teaching assistant that explains STEM concepts in the student's native language (Hindi, Telugu, Kannada, etc.) using analogies from their local context, with voice interaction support.
PRJ_43	Learning Disability Early Identification Tool for Teachers	Python, ML, React, FastAPI, Assessment Engine	SDG 4, SDG 3	Dyslexia, dyscalculia, and ADHD often go undiagnosed in Indian schools because teachers lack screening tools. Build a digital assessment platform where teachers administer standardized exercises, and ML analyzes response patterns, timing, and error types to flag students likely to have learning disabilities for specialist referral.
PRJ_44	Automated Question Paper Generator with Bloom's Taxonomy Balancing	Python, NLP, LLM, FastAPI, React	SDG 4, SDG 9	Teachers spend hours manually creating balanced question papers. Build an AI system where teachers input the syllabus/topics, and the system auto-generates question papers balancing difficulty levels (Remember, Understand, Apply, Analyze, Evaluate, Create) per Bloom's Taxonomy, with multiple format variants to prevent cheating.
PRJ_45	Peer Tutoring Matching Platform with Outcome Tracking	React, FastAPI, ML, MySQL, Flutter	SDG 4, SDG 10	Peer tutoring significantly improves learning outcomes but matchmaking is done manually. Build an ML-powered platform that matches struggling students with high-performing peers based on learning style compatibility, subject strength, availability, and past tutoring success rates, with session outcome tracking.
PRJ_46	Menstrual Health Tracking and Anaemia Screening for Rural Women	Flutter, FastAPI, ML, Firebase, SMS	SDG 3, SDG 5	Anaemia affects 57% of Indian women but goes undiagnosed in rural areas. Build a privacy-first menstrual health app that tracks cycles, nutrition intake, and fatigue symptoms, uses ML to identify anaemia risk patterns, and connects at-risk women to nearby health camps and iron supplementation programs.
PRJ_47	Domestic Violence Evidence Preservation App	Flutter, AES Encryption, Firebase, FastAPI, Legal API	SDG 5, SDG 16	Victims of domestic violence often lose evidence before reaching legal help. Build a secure mobile app that allows victims to time-stamp and encrypt photos, audio recordings, and messages as legally admissible evidence, stores them in tamper-proof cloud storage, and connects to NGO helplines and nearest police stations.
PRJ_48	Gender Pay Gap Analyzer for Indian Organizations	Python, ML, FastAPI, React, HR Data APIs	SDG 5, SDG 8	Despite laws requiring equal pay, gender pay gaps persist across Indian industries but are rarely measured. Build an anonymous HR analytics tool that analyzes salary data across roles, experience, and gender to quantify pay gaps, identify root causes (role segregation, promotion gaps), and recommend equitable compensation frameworks.
PRJ_49	Real-Time Indian Sign Language Interpreter for Classrooms	Python, MediaPipe, CNN-LSTM, FastAPI, React	SDG 4, SDG 10	Indian Sign Language (ISL) is distinct from ASL and has no reliable real-time interpreter system. Deaf students in mainstream classrooms are excluded. Build a camera-based ISL recognition system that translates continuous signing into text/speech in real time, with a dataset contribution module to expand ISL vocabulary coverage.
PRJ_50	Cognitive Accessibility Simplifier for Government Documents	Python, LLM, NLP, FastAPI, React, Chrome Extension	SDG 10, SDG 16	Government circulars, legal notices, and scheme guidelines are written in complex language excluding millions of citizens with low literacy or cognitive disabilities. Build a tool that automatically simplifies documents into plain language (grade 5 reading level), adds visual icons, and provides audio narration in regional languages.
PRJ_51	Navigation Assistant for Visually Impaired in Public Spaces	Flutter, ARCore, Computer Vision, BLE Beacons, FastAPI	SDG 10, SDG 11	Visually impaired people face severe navigation barriers in public spaces like hospitals, railway stations, and government offices that lack accessible infrastructure. Build an audio-guided navigation app using BLE beacons and computer vision that describes surroundings, detects obstacles, reads signboards, and guides users with spatial audio cues.
PRJ_52	Construction and Demolition Waste Material Recovery Marketplace	React, FastAPI, MySQL, Google Maps API, Flutter	SDG 11, SDG 12	C&D waste constitutes 40% of India's total waste but most is dumped illegally. Recyclable materials (steel, bricks, wood) have value but no exchange mechanism. Build a platform where demolition sites list recoverable materials, and recyclers/contractors bid to collect them, reducing landfill while creating economic value.
PRJ_53	Textile Waste Upcycling Network for Small Garment Units	React, FastAPI, MySQL, Flutter, Razorpay	SDG 12, SDG 8	Small garment factories generate large quantities of fabric offcuts that are burned or dumped. Artisans and startups need these offcuts for upcycling. Build a B2B marketplace connecting garment factories with offcut buyers (bag makers, toy manufacturers, artists), with logistics coordination and impact tracking.
PRJ_54	Food Waste Redistribution Network for Urban Restaurants	Flutter, FastAPI, MySQL, Google Maps, Firebase	SDG 2, SDG 12	Urban restaurants waste tons of edible food daily while urban homeless populations go hungry. Existing food redistribution apps fail because pickup logistics are uncoordinated. Build a real-time system where restaurants post surplus food with pickup windows, NGOs/volunteers claim pickups via optimized routing, with freshness verification.
PRJ_55	AI-Generated Deepfake Audio Detection for Phone Fraud	Python, Librosa, ML, FastAPI, Telephony API	SDG 16, SDG 9	Voice cloning technology enables fraudsters to impersonate family members/executives in phone calls to extract money. Build a real-time deepfake audio detector that analyzes call audio streams for synthesis artifacts (spectral inconsistencies, unnatural prosody) and warns recipients before they act on fraudulent requests.
PRJ_56	Supply Chain Software Dependency Vulnerability Scanner	Python, SBOM Analysis, NVD API, FastAPI, React	SDG 9, SDG 16	Modern software has thousands of open-source dependencies. Most organizations have no visibility into vulnerable transitive dependencies in their software supply chain. Build an SBOM (Software Bill of Materials) generator and continuous vulnerability scanner that tracks all dependencies and auto-alerts on newly disclosed CVEs.
PRJ_57	Insider Threat Detection via Behavioral Biometrics	Python, ML, User Activity Logs, FastAPI, React	SDG 9, SDG 16	Insider threats — malicious or negligent employees exfiltrating data — cause 60% of data breaches but are nearly invisible to traditional security tools. Build a behavioral biometrics system that establishes baselines for each user's activity patterns (file access, typing, navigation) and flags significant deviations as potential insider threat signals.
PRJ_58	API Security Fuzzer with Business Logic Attack Detection	Python, FastAPI, ML, React, REST/GraphQL	SDG 9, SDG 16	Most API security tools detect injection/auth flaws but miss business logic attacks (e.g., negative quantity orders, privilege abuse, rate limit bypass). Build an intelligent API fuzzer that understands API semantics, generates adversarial business logic test cases, and identifies logic vulnerabilities that rule-based scanners miss.
PRJ_59	Last-Mile Delivery Optimization for Rural Pin Codes	Python, OR-Tools, FastAPI, React, Google Maps	SDG 9, SDG 10	E-commerce delivery to rural pin codes is 3-5x costlier than urban, making rural India underserved. Build a last-mile route optimization system using vehicle routing algorithms (OR-Tools/VRP) that clusters rural deliveries, identifies optimal hub locations, and plans multi-stop routes considering road quality and village access constraints.
PRJ_60	Perishable Food Logistics Waste Predictor	Python, ML, FastAPI, React, Temperature IoT	SDG 2, SDG 12	Perishable food in transit loses quality due to temperature excursions but logistics operators cannot predict exact remaining shelf life. Build an IoT + ML system that combines real-time temperature/humidity sensor data from vehicles with product-specific degradation models to predict remaining shelf life and trigger rerouting to nearer destinations.
PRJ_61	Counterfeit Pharmaceutical Detection via Spectral Fingerprinting	Python, Spectroscopy Sensor, ML, FastAPI, Flutter	SDG 3, SDG 16	Counterfeit medicines kill 250,000+ people annually in developing countries. Lab testing is too slow for supply chain use. Build a portable spectroscopy-based scanner that captures the chemical fingerprint of tablet coatings, compares against an authenticated database using ML, and flags counterfeits in real time at distributor/pharmacy level.

PRJ_62	Loneliness Risk Prediction for Urban Elderly Living Alone	Python, ML, IoT Passive Sensors, FastAPI, Flutter	SDG 3, SDG 10	Social isolation in elderly urban residents leads to cognitive decline and suicide. Build a passive monitoring system using non-intrusive IoT sensors (motion, door open/close, appliance usage) that detects reduced activity patterns correlated with social withdrawal, alerting family members or welfare workers before health deterioration occurs.
PRJ_63	Burnout Early Warning System for IT Employees	Python, ML, FastAPI, React, HR System Integration	SDG 3, SDG 8	IT sector burnout causes massive productivity losses and attrition. Build a privacy-preserving workplace analytics tool that analyzes anonymized patterns (after-hours work frequency, communication sentiment in emails/tickets, leave patterns) to compute team-level burnout risk scores, alerting HR managers without exposing individual data.
PRJ_64	Social Media Addiction Intervention Tool for Teenagers	Flutter, FastAPI, ML, Screen Time API, Firebase	SDG 3, SDG 4	Social media addiction in teenagers correlates with depression and poor academic performance. Existing screen time tools are easily bypassed. Build a parental guidance app that uses ML to distinguish productive vs addictive usage patterns, delivers contextual nudges during addition spikes, and provides weekly behavioral reports to parents and teens.
PRJ_65	Real-Time Weld Quality Inspection Using Computer Vision	Python, YOLO, Computer Vision, FastAPI, React, Industrial Camera	SDG 9, SDG 12	Weld quality inspection in manufacturing is done manually by inspectors, missing micro-defects and creating bottlenecks. Build an inline computer vision system using industrial cameras and YOLO-based defect detection to classify weld quality in real time (porosity, cracks, undercuts), reducing defect escape rates and inspection costs.
PRJ_66	Worker Safety Compliance Monitoring on Construction Sites	Python, YOLO, CCTV, FastAPI, React, SMS Gateway	SDG 8, SDG 3	Construction site safety violations (no helmets, no harnesses at height) cause thousands of deaths in India annually. Build a real-time CCTV-based AI system that detects PPE non-compliance using object detection, identifies the zone of violation, and triggers immediate alerts to site supervisors via SMS and dashboard.
PRJ_67	Energy Consumption Disaggregation for Industrial Units	Python, ML, ESP32, Current Sensors, FastAPI, React	SDG 7, SDG 12	Industrial units pay high energy bills but cannot identify which machines are energy hogs without expensive sub-metering of every circuit. Build a non-intrusive load monitoring system using ML trained on aggregate current waveforms to disaggregate energy consumption by machine type, enabling targeted energy audits and savings.
PRJ_68	Tool Wear Prediction for CNC Machining Operations	Python, ML, Vibration Sensor, FastAPI, React	SDG 9, SDG 12	Unexpected CNC tool breakage causes costly machine downtime and scrap production. Tool replacement on fixed schedules wastes good tools. Build a sensor-based tool wear monitoring system using vibration and cutting force signals analyzed by ML to predict remaining tool life and schedule replacement at the optimal time.
PRJ_69	AI-Assisted Budget Allocation Optimizer for Gram Panchayats	Python, ML, React, FastAPI, MySQL	SDG 1, SDG 16	Gram Panchayats receive development funds but lack data-driven tools to prioritize spending across roads, water, sanitation, and education. Build a decision support system that analyzes village demographic data, existing infrastructure gaps, and scheme guidelines to recommend optimal budget allocation with impact projections.
PRJ_70	Automated Parliamentary/Legislative Question Relevance Analyzer	Python, NLP, LLM, FastAPI, React	SDG 16, SDG 10	Legislative bodies receive thousands of questions from MPs/MLAs; many are irrelevant, duplicate, or misleading. Build an NLP system that analyzes submitted questions for factual accuracy, relevance to ministerial domain, duplication, and potential misinformation, assisting secretariats in question curation and classification.
PRJ_71	Real-Time Welfare Scheme Leakage Detection System	Python, ML, FastAPI, React, Government DB Integration	SDG 1, SDG 16	Ghost beneficiaries siphon billions from welfare schemes (PDS, MGNREGA). Aadhaar-linking reduced but didn't eliminate fraud. Build an ML system that cross-correlates beneficiary databases, detects duplicate identities, flags anomalous benefit patterns (same biometric across districts), and generates audit reports for social audit committees.
PRJ_72	Drunk/Drowsy Driving Real-Time Detection via Steering Behavior	Python, ML, OBD2 Sensor, Gyroscope, FastAPI, Flutter	SDG 3, SDG 11	Drunk and drowsy driving cause 30%+ of road fatalities in India. Existing breathalyzer-based detection requires stops. Build a passive in-vehicle monitoring system analyzing steering micro-corrections, lane deviation patterns, and braking behavior via OBD2 and accelerometer data to detect impairment in real time and alert drivers/fleet managers.
PRJ_73	Intercity Bus Overloading and Fatigue Monitoring System	ESP32, Weight Sensor, Camera, ML, FastAPI, SMS	SDG 3, SDG 11	Overloaded and fatigue-driven intercity buses cause mass fatality accidents in India. Build an integrated monitoring system combining weigh-in-motion sensors (passenger load), driver facial fatigue detection via cabin camera, and trip-hour tracking to generate real-time alerts and automatic reports to transport authorities.
PRJ_74	Predictive Maintenance for Rural Road Bridges	IoT Vibration Sensors, LSTM, FastAPI, React GIS, SMS	SDG 9, SDG 11	Thousands of rural bridges in India are structurally compromised but inspected only annually or after failure. Build an IoT structural health monitoring system using vibration and strain sensors to track modal frequency changes in bridge structures, applying LSTM to predict deterioration rates and trigger inspections before failure.
PRJ_75	Peer-to-Peer Solar Energy Trading Platform for Housing Societies	React, FastAPI, Blockchain, Smart Meter API, Razorpay	SDG 7, SDG 11	Housing societies with rooftop solar generate excess energy that is sold to DISCOM at low rates while neighbors without solar pay high tariffs. Build a blockchain-based P2P energy trading platform enabling solar households to sell excess energy directly to neighbors within the society at mutually agreed prices, bypassing DISCOM.
PRJ_76	Grid Stability Risk Predictor for Renewable Energy Integration	Python, ML, SCADA Data, FastAPI, React Dashboard	SDG 7, SDG 9	Integrating intermittent solar/wind energy into the grid causes frequency instability. Grid operators lack predictive tools. Build an ML system trained on historical load, generation, and weather data to predict grid stability risks 15-30 minutes ahead when renewable output fluctuates, enabling preemptive stabilization actions.
PRJ_77	Automated Energy Audit Report Generator for SMEs	Python, ML, FastAPI, React, IoT Smart Meter	SDG 7, SDG 12	SMEs pay for expensive energy audits but rarely act on findings due to complex technical reports. Build an automated energy audit system that collects smart meter + sub-meter data, benchmarks consumption against industry norms, identifies waste patterns using ML, and generates prioritized, plain-language action reports with payback calculations.
PRJ_78	Automated Contract Clause Risk Analyzer for MSMEs	Python, NLP, LLM, FastAPI, React	SDG 8, SDG 16	MSMEs sign vendor/client contracts without legal review due to cost, exposing them to unfair penalty clauses, IP traps, and payment risks. Build a tool that analyzes uploaded contracts using NLP/LLM to identify high-risk clauses, compares them against standard industry benchmarks, and generates a plain-language risk summary.
PRJ_79	Legal Aid Eligibility and Case Strength Estimator	Python, NLP, LLM, FastAPI, React, Legal DB	SDG 16, SDG 10	Marginalized citizens don't access legal aid because they don't know if they qualify or if their case is strong enough to pursue. Build a conversational system where citizens describe their legal situation in plain language, and NLP + LLM analyzes eligibility for legal aid, estimates case strength, and recommends the nearest appropriate legal resource.
PRJ_80	Open Defecation Detection System for ODF Village Verification	Python, Computer Vision, Drone Imagery, FastAPI, React GIS	SDG 6, SDG 3	India's ODF (Open Defecation Free) program declarations are often fraudulent. Actual verification requires ground surveys of thousands of villages. Build a drone imagery + CV system that detects open defecation activity patterns in satellite/drone images of village perimeters, enabling objective ODF status verification at scale.
PRJ_81	Sewage Treatment Plant Compliance Monitoring via Remote Sensing	Python, Sentinel-2, Water Quality Indices, ML, FastAPI, React	SDG 6, SDG 14	Most Indian STPs discharge undertreated sewage into rivers but CPCB lacks real-time monitoring beyond manual spot checks. Build a satellite-based water quality monitoring system that detects changes in turbidity, algal bloom, and pollution indices downstream of STP discharge points, flagging compliance violations automatically.
PRJ_82	Real-Time UPI Fraud Pattern Detection for Small Banks	Python, ML, Kafka, FastAPI, React	SDG 8, SDG 16	Small cooperative and regional banks lack real-time fraud detection for UPI transactions, relying on next-day batch reports. Build a streaming ML fraud detection pipeline that processes UPI transactions in real time, scores each transaction for fraud probability using behavioral and network features, and auto-holds suspicious transactions for review.
PRJ_83	Chit Fund Digitization and Fraud Prevention Platform	React, FastAPI, MySQL, Python ML, Razorpay	SDG 1, SDG 8	Chit funds serve 100M+ low-income Indians but are riddled with fraud and mismanagement due to paper-based operations. Build a digital chit fund management platform with member onboarding, automated auction/bidding, payment tracking, dividend calculation, and ML-based fraud detection flagging operators who manipulate auctions.
PRJ_84	Cultural Heritage Site Deterioration Monitoring Using Photogrammetry	Python, 3D Photogrammetry, ML, FastAPI, React	SDG 11, SDG 9	India's 3,000+ ASI-protected monuments deteriorate faster than they can be manually inspected. Build a photogrammetry-based monitoring system where volunteers/drones capture monument images periodically, and ML-based 3D comparison detects micro-cracks, structural shifts, and surface erosion changes invisible to casual inspection.
PRJ_85	Misinformation Cascade Tracker in WhatsApp Forwards	Python, NLP, ML, FastAPI, React, WhatsApp Business API	SDG 16, SDG 4	WhatsApp forwards spread health misinformation (fake cancer cures, vaccine myths) virally in India. Build a system connected to fact-checking APIs that monitors reported suspicious messages, traces forward cascade patterns, identifies origin accounts, and provides verified counter-content in regional languages for sharing.
PRJ_86	Automated Bird Migration Route Mapping Using Citizen Science	Python, Computer Vision, FastAPI, React GIS, ML	SDG 15, SDG 13	Bird migration routes in South Asia are poorly documented, hindering conservation. Citizen photos are scattered and unstructured. Build a platform where birdwatchers upload photos, AI auto-identifies species using CV, geo-tags sightings, and aggregates data to generate real-time migration route maps and population trend analysis.
PRJ_87	Automated Tender Document Compliance Checker for MSMEs	Python, NLP, LLM, FastAPI, React	SDG 8, SDG 9	MSMEs lose government tender opportunities because their bid documents don't comply with complex eligibility criteria. Build a tool where MSMEs upload tender documents and their capability profile, and NLP/LLM checks each eligibility criterion, identifies gaps, and suggests how to strengthen the bid within compliance rules.
PRJ_88	Real-Time Sign Language News Interpreter for Broadcast Media	Python, 3D Avatar, MediaPipe, NLP, FastAPI, React	SDG 10, SDG 16	Deaf viewers have no access to real-time news in Indian Sign Language. Human interpreters are expensive and scarce for 24/7 broadcast. Build an AI system that takes live news text/speech input, converts it to ISL gloss using NLP, and renders a 3D avatar performing real-time ISL for overlay on news broadcasts or streaming platforms.
PRJ_89	AI-Powered Braille Content Generator for Visually Impaired Students	Python, NLP, LLM, FastAPI, React, Braille Embosser API	SDG 4, SDG 10	Braille textbooks for visually impaired students are scarce and expensive. Build an AI system that converts digital textbooks and documents into properly formatted Braille-ready output, handling mathematical notation, tables, and diagrams with tactile diagram descriptions, enabling on-demand Braille printing at low cost.
PRJ_90	Automated Irrigation Scheduling Using Evapotranspiration Modeling	Python, Weather API, LSTM, FastAPI, ESP32, Flutter	SDG 2, SDG 6	Farmers over-irrigate due to lack of scientific scheduling tools, wasting 60% of irrigation water. Build a system that computes crop-specific daily evapotranspiration using weather data and growth stage models, automatically scheduling irrigation valve opening/closing via IoT to deliver exactly the water crops need.
PRJ_91	Hyperlocal Air Quality Forecast for Asthma/COPD Patients	Python, ML, IoT Sensors, FastAPI, Flutter, Health API	SDG 3, SDG 11	Asthma and COPD patients need 24-hour advance warning of poor air quality to adjust medications and avoid outdoor activity. Build a personal health-weather integration system that combines hyperlocal air quality sensor networks with patient respiratory health data to issue personalized air quality alerts calibrated to individual health thresholds.
PRJ_92	Automated Scholarship Discovery and Application Tracker	Python, Web Scraping, NLP, FastAPI, Flutter, Email API	SDG 4, SDG 10	Thousands of scholarships go unclaimed because students don't know they exist or miss deadlines. Build a platform that aggregates scholarships from government and private sources, matches them to student profiles, sends deadline reminders, auto-fills application forms from stored documents, and tracks application status.

PRJ_93	Smart Helmet with Accident Detection and Emergency SOS for Two-Wheelers	ESP32, MPU6050, GPS, GSM, Flutter, FastAPI	SDG 3, SDG 11	Two-wheeler accidents kill 150,000+ in India annually. Injured riders often cannot call for help. Build a smart helmet with embedded ESP32 that detects accident impact using accelerometer data, automatically sends GPS coordinates and emergency SOS to registered contacts and nearest hospital within seconds of crash detection.
PRJ_94	Decentralized Identity Verification for Migrant Workers	Solidity, IPFS, Web3.js, React, FastAPI, Aadhaar API	SDG 8, SDG 10	Migrant workers moving between states lose access to benefits because local authorities cannot verify their identity and entitlements. Build a decentralized identity system on blockchain where workers control their verified credentials, and any state government or employer can verify identity and benefit eligibility without a central database.
PRJ_95	Real-Time Sign Verification for Indian Financial Documents	Python, Computer Vision, ML, FastAPI, React	SDG 8, SDG 16	Cheque fraud and forged signatures on financial documents cause billions in losses in India. Build a deep learning-based signature verification system that compares signatures on scanned documents against registered samples, detecting forgeries with explainable AI highlighting inconsistencies for bank officer review.
PRJ_96	Automated Manhole and Open Drain Detection for Smart Cities	Python, YOLO, Mobile Camera, FastAPI, React GIS, Crowdsourcing	SDG 11, SDG 3	Uncovered manholes and open drains in Indian cities cause deaths and injuries, especially during monsoon flooding. Build a crowdsourced hazard reporting system where citizen smartphone cameras auto-detect open manholes using YOLO, geo-tag the location, and submit to a municipal dashboard with priority scoring based on foot traffic density.
PRJ_97	Personalized Nutrition Planner for Diabetes Management in India	Python, ML, FastAPI, Flutter, Food DB API	SDG 3, SDG 2	India has the world's largest diabetic population but personalized dietary management is accessible only to the wealthy. Build an AI nutrition planner that considers Indian regional food preferences, glycemic indices of local foods, individual glucose response patterns, and affordability constraints to generate personalized meal plans with shopping lists.
PRJ_98	Automated Financial Statement Fraud Detection for Startup Investors	Python, ML, NLP, FastAPI, React, MCA API	SDG 8, SDG 16	Startup investors are defrauded by manipulated financial statements. Manual audits are expensive and slow. Build an ML system that analyzes financial statements fetched from MCA/ROC filings, applies Benford's Law analysis, ratio anomaly detection, and NLP on auditor notes to flag statistical patterns consistent with financial fraud.
PRJ_99	AI-Based Crop Yield Estimation Using Field Photographs	Python, CNN, Transfer Learning, FastAPI, Flutter	SDG 2, SDG 8	Accurate pre-harvest crop yield estimation is critical for insurance, procurement, and price stabilization but requires expensive expert surveys. Build a mobile app where field agents photograph standing crops, and a CNN model estimates yield per acre based on plant density, growth stage, and visible health indicators.
PRJ_100	Real-Time Hate Speech Detection for Regional Indian Languages	Python, IndicBERT, NLP, FastAPI, React, Social Media API	SDG 16, SDG 10	Hate speech in Hindi, Tamil, Bengali, and Telugu on social media incites communal violence but existing content moderation tools only work for English. Build a multilingual hate speech detection system using IndicBERT fine-tuned on regional language datasets to classify posts in real time, with confidence scores and context-aware explainability.
PRJ_101	PLC-Integrated AMR Fleet Management System with Real-Time Path Optimization	PLC, AMR, Path Planning, Optimization	SDG9, SDG11	Develop an intelligent PLC-integrated AMR fleet management system with real-time path optimization to improve warehouse efficiency, reduce travel time, and enable safe multi-robot coordination.
PRJ_102	Cobot-PLC Collaborative Work Cell with Vision-Based Quality Inspection	Cobot, PLC, Computer Vision, Industrial Ethernet	SDG9, SDG8	Design a collaborative cobot work cell integrated with PLC and computer vision for automated quality inspection, enhancing production accuracy and reducing manual intervention.
PRJ_103	SLAM-Based Indoor Navigation for Balancer AMR with PLC Safety Zones	SLAM, AMR, PLC, Navigation, Robotics	SDG9, SDG3	Develop a SLAM-based indoor navigation system for autonomous mobile robots with PLC-controlled safety zones to ensure precise navigation and safe industrial operation.
PRJ_104	PLC-Based Automated Welding Line Monitoring and Predictive Maintenance	PLC, Predictive Maintenance, IoT, Machine Learning	SDG9, SDG12	Implement a PLC-based welding line monitoring system with predictive maintenance using IoT data to minimize downtime and improve manufacturing productivity.
PRJ_105	Intelligent PLC-Controlled Packaging Line with Computer Vision Barcode Verification	PLC, Computer Vision, Barcode Verification	SDG9, SDG12	Develop an intelligent PLC-controlled packaging line with computer vision barcode verification for automated product identification, traceability, and quality assurance.
PRJ_106	PLC & SCADA-Based Environmental Control System with Compliance Reporting	PLC, SCADA, Reporting, SCADA System	SDG13, SDG9	Design a PLC and SCADA-based environmental monitoring and control system with automated compliance reporting for industrial facilities.
PRJ_107	Digital Twin of AGV Warehouse Workflow using ROS2 and Unity3D	ROS2, Unity3D, AGV, Digital Twin	SDG9, SDG11	Create a digital twin of an AGV-enabled warehouse workflow using ROS2 and Unity3D for real-time monitoring, simulation, and operational optimization.
PRJ_108	Collaborative Robot Bin-Picking System with 3D Vision and Force-Torque Sensing	3D Vision, Force-Torque Sensors, Cobot	SDG9, SDG8	Develop a collaborative robot bin-picking system using 3D vision and force-torque sensing for accurate object detection, grasp planning, and flexible automation.
PRJ_109	Edge AI-Powered PLC Anomaly Detection for Motor Drive Systems	Edge AI, PLC, Anomaly Detection, AI	SDG9, SDG7	Implement an Edge AI-powered PLC anomaly detection system for motor drives to enable early fault detection, predictive maintenance, and improved energy efficiency.
PRJ_110	PLC Training Simulator with Gamified Learning Platform for Engineering Students	PLC Simulator, Gamification, Educational Software	SDG4, SDG9	Develop a gamified PLC training simulator to provide engineering students with hands-on industrial automation experience through interactive virtual experiments.
PRJ_111	Development of software application for analysis and processing of dvbs2 receiver output stream i.e., raw BB Frames, GSE and TS in near real time.	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Development of software application for analysis and processing of dvbs2 receiver output stream i.e., raw BB Frames, GSE using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_112	Domain Name Server (DNS) Filtering Service using Threat Intelligence feeds and AI/ML Techniques	Cybersecurity, AI/ML, Artificial Intelligence	SDG9, SDG16	Design and develop a solution for Domain Name Server (DNS) Filtering Service using Threat Intelligence feeds and AI/ML Techniques using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_113	Quantum Secure Email Client Application	Quantum Computing, Cryptography, AI	SDG9, SDG16	Design and develop a solution for Quantum Secure Email Client Application using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_114	Development of UT (user terminal) to UT Voice, Image, Video and Data Communication APP (Android or iOS) using Bluetooth 2.0 or above wireless interface and custom protocol	Computer Vision, Video Processing, AI	SDG9	Design and develop a solution for Development of UT (user terminal) to UT Voice, Image, Video and Data Communication APP (Android or iOS) using Bluetooth using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_115	Development of Explainable AI (XAI) based model for prediction of heavy /high impact rain events using satellite data	Artificial Intelligence, Machine Learning	SDG9	Design and develop a solution for Development of Explainable AI (XAI) based model for prediction of heavy /high impact rain events using satellite data using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_116	Development of NTRIP (Network Transport of RTCM via internet protocol) Caster, NTRIP Client and Server on web or mobile platform.	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Development of NTRIP (Network Transport of RTCM via internet protocol) Caster, NTRIP Client and Server on web or mobile using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_117	Generation of Hazard map at 1m grid spacing (1m height resolution) using 5m spatial resolution data for safely navigating a Lander to a safe landing site using Super resolution techniques.	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Generation of Hazard map at 1m grid spacing (1m height resolution) using 5m spatial resolution data for safely navigating a Lander to a safe landing site using Super resolution techniques.
PRJ_118	Change detection due to human activities.	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Change detection due to human activities using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_119	Identification of place names from a natural language sentence.	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Identification of place names from a natural language sentence using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_120	Suggest an AI-based solution to enable ease of grievance lodging and tracking for citizens across multiple departments	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Suggest an AI-based solution to enable ease of grievance lodging and tracking for citizens across multiple departments using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_121	Smart and Effective realtime Management of street parking	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Smart and Effective realtime Management of street parking using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_122	Comprehensive Inspection and Analysis of Water Supply Distribution Lines	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Comprehensive Inspection and Analysis of Water Supply Distribution Lines using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_123	Effective management of construction and demolition (C&D) waste	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Effective management of construction and demolition (C&D) waste using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_124	Centralized Monitoring System for Street Light Fault Detection and Location Tracking	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Centralized Monitoring System for Street Light Fault Detection and Location Tracking using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_125	Real time Knowledge of ore body being mined out	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Real time Knowledge of ore body being mined out using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_126	Land profiling of Asset Creation process	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Land profiling of Asset Creation process using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_127	Creation of dedicated real time 'Procurement Data Portal' as well as 'Vendor Payment Data portal' to capture all related data in respect of NEEPCO, S Procurements and Payments' including Procurement from MSE Sector and procurement in	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Creation of dedicated real time 'Procurement Data Portal' as well as 'Vendor Payment Data portal' to capture all related data using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_128	Frequent dislodgement of belt conveyor along hilly terrain for various reasons	Artificial Intelligence, Machine Learning	SDG9	Design and develop a solution for Frequent dislodgement of belt conveyor along hilly terrain for various reasons using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_129	Leveraging the power of deep learning to overcome the challenges of marine engineering and improve vessel operations:	Artificial Intelligence, Cloud Computing	SDG9	Design and develop a solution for Leveraging the power of deep learning to overcome the challenges of marine engineering and improve vessel operations: using modern technologies to improve performance, automation, security, scalability, and real-world usability.

PRJ_130	Aerial Location of Hazardous Atmosphere in Industries	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Aerial Location of Hazardous Atmosphere in Industries using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_131	Capacity building, performance assessment and motivation driven tool for faculty upgradation	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Capacity building, performance assessment and motivation driven tool for faculty upgradation using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_132	Automatic Drug Dispenser	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Automatic Drug Dispenser using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_133	Blended Learning to overcome inadequate infrastructure	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Blended Learning to overcome inadequate infrastructure using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_134	Development of Virtual Reality (VR) technology for Dhatuposhana Nyaya	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Development of Virtual Reality (VR) technology for Dhatuposhana Nyaya using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_135	Education ecosystem for specially abled student need provision and improvement to take care of compliance, governance and conduct.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Education ecosystem for specially abled student need provision and improvement to take care of compliance, governance an using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_136	Green options for milk packaging (Low cost, environment-friendly, and extended shelf life packaging for milk)	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Green options for milk packaging (Low cost, environment-friendly, and extended shelf life packaging for milk) using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_137	Develop a Proctored exam tool for shortlisting the candidates for the national and international level hackathons.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Develop a Proctored exam tool for shortlisting the candidates for the national and international level hackathons using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_138	AI-Powered Smart Toy and Educational Game Platform	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for AI-Powered Smart Toy and Educational Game Platform using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_139	AI-Driven Resource Optimization and Decision Support System	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for AI-Driven Resource Optimization and Decision Support System using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_140	Smart Fitness Monitoring and Personal Health Assistant	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Smart Fitness Monitoring and Personal Health Assistant using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_141	Digital Platform for Indian Cultural Heritage Preservation	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Digital Platform for Indian Cultural Heritage Preservation using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_142	AI-Based Smart Healthcare Assistance System	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for AI-Based Smart Healthcare Assistance System using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_143	Smart Agriculture Monitoring and Produce Management System	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Smart Agriculture Monitoring and Produce Management System using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_144	Intelligent Smart Transportation and Traffic Management	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Intelligent Smart Transportation and Traffic Management using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_145	Smart City Resource and Logistics Optimization Platform	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Smart City Resource and Logistics Optimization Platform using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_146	Autonomous Drone and Rescue Robot System	Drone Technology	SDG9	Design and develop a solution for Autonomous Drone and Rescue Robot System using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_147	Smart Waste Segregation and Sanitation System	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Smart Waste Segregation and Sanitation System using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_148	AI-Based Smart Tourism and Hospitality Platform	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for AI-Based Smart Tourism and Hospitality Platform using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_149	Renewable Energy Monitoring and Optimization System	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Renewable Energy Monitoring and Optimization System using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_150	Blockchain-Based Secure Digital Asset Management	Artificial Intelligence, Machine Learn	SDG9, SDG16	Design and develop a solution for Blockchain-Based Secure Digital Asset Management using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_151	Smart Service Industry Automation Platform	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Smart Service Industry Automation Platform using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_152	Disaster Risk Prediction and Emergency Management System	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Disaster Risk Prediction and Emergency Management System using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_153	AI-Enabled Smart Education and Learning Platform	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for AI-Enabled Smart Education and Learning Platform using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_154	A unified portal for developing a model Curriculum for all the AICTE Approved Institutes	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for A unified portal for developing a model Curriculum for all the AICTE Approved Institutes using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_155	Design and Developed a personalized online meeting system for AICTE	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Design and Developed a personalized online meeting system for AICTE using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_156	Establishing a Server log system for E-governance with appropriate notification and content based classification of log AICTE	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Establishing a Server log system for E-governance with appropriate notification and content based classification of log using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_157	Awareness and Preparedness Towards Disaster Management	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Awareness and Preparedness Towards Disaster Management using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_158	Cybersecurity Portal for Effective Management of Servers and Firewalls	Cybersecurity, AI/ML	SDG9, SDG16	Design and develop a solution for Cybersecurity Portal for Effective Management of Servers and Firewalls using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_159	Integration of AI for Adaptive Learning for MCQ Selection in PARAKH	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Integration of AI for Adaptive Learning for MCQ Selection in PARAKH using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_160	Integration of Multiple Data-bases of AICTE in order to fetch Coherent Information	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Integration of Multiple Data-bases of AICTE in order to fetch Coherent Information using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_161	AI Based - Designing of Assistive portal for Stakeholders in Approval Process	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for AI Based - Designing of Assistive portal for Stakeholders in Approval Process using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_162	Get Fit Faster with a High-Tech Tracker: Analyze Human Activity and GPS Data for Improved Results	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Get Fit Faster with a High-Tech Tracker: Analyze Human Activity and GPS Data for Improved Results using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_163	Speech to text transcription for Indian languages. The problem entails transcription in the native script and then translation to English. The languages of interest are Hindi, Indian English, Urdu, Bengali, Punjabi.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Speech to text transcription for Indian languages. The problem entails transcription in the native script and then trans using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_164	Efficient enumeration of URLs of active hidden servers over anonymous channel (TOR)	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Efficient enumeration of URLs of active hidden servers over anonymous channel (TOR) using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_165	Create an intelligent system using AI/ML to detect phishing domains which imitate look and feel of genuine domains	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Create an intelligent system using AI/ML to detect phishing domains which imitate look and feel of genuine domains using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_166	Investigation of vulnerabilities in implementation of crypto library used by OpenVPN for Internet Protocol Security (IPsec), IPV6 deployment.	Cybersecurity, AI/ML	SDG9, SDG16	Design and develop a solution for Investigation of vulnerabilities in implementation of crypto library used by OpenVPN for Internet Protocol Security (IPs using modern technologies to improve performance, automation, security, scalability, and real-world usability.

PRJ_167	Develop Ransomware Readiness Assessment tool.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Develop Ransomware Readiness Assessment tool using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_168	Develop a AI/ML tool to detect whether a system / firewall /router / network is compromised. The technique should not rely only on IoCs (Indicators of Compromises) detection.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Develop a AI/ML tool to detect whether a system / firewall /router / network is compromised. The technique should not re using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_169	Develop and deploy a Large Language Model (LLM) based tool for generating human like responses to natural language inputs for network not connected over internet	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Develop and deploy a Large Language Model (LLM) based tool for generating human like responses to natural language input using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_170	Design, develop and implement a software bill of materials (SBOM) generation tool that can generate the complete SBOM of custom-developed software (including in-house developments by organisations)	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Design, develop and implement a software bill of materials (SBOM) generation tool that can generate the complete SBOM of using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_171	Design of RF Up/Down-converter for signals using GNU Radio and SDRs.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Design of RF Up/Down-converter for signals using GNU Radio and SDRs using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_172	Identification and Extraction of Forward Error Correction (FEC) schemes of unknown demodulated signals	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Identification and Extraction of Forward Error Correction (FEC) schemes of unknown demodulated signals using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_173	Developing a GUI based hardening script for Ubuntu operating system with flexibility to cater for organisational security policies	Cybersecurity, AI/ML	SDG9, SDG16	Design and develop a solution for Developing a GUI based hardening script for Ubuntu operating system with flexibility to cater for organisational securit using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_174	De-anonymisation for monitoring and tracking of illegal activities performed using cryptocurrency transaction technology	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for De-anonymisation for monitoring and tracking of illegal activities performed using cryptocurrency transaction technology using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_175	Students to use Autodesk Fusion 360 to research and develop a design on "Smart Glass Cleaning Robot", which can climb, clean, and carry liquid cleaners. For additional information and detailed problem statement, please visit: https://damassets.autodesk.net/content/dam/autodesk/www/pdfs/sih-2023-software-edition.pdf	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Students to use Autodesk Fusion 360 to research and develop a design on "Smart Glass Cleaning Robot", which can climb, c using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_176	Students to use Autodesk Fusion 360 to research and to generate NC code with machine details & tool library for any industrial component. For additional information and detailed problem statement, please visit: https://damassets.autodesk.net/content/dam/autodesk/www/pdfs/sih-2023-hardware-edition-cnc.pdf	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Students to use Autodesk Fusion 360 to research and to generate NC code with machine details & tool library for any indu using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_177	Students to use Autodesk Fusion 360 to research and redesign a conventional automotive component commonly found in vehicles and utilize generative design to reimagine its design. For additional information and detailed problem statement, please visit: https://damassets.autodesk.net/content/dam/autodesk/www/pdfs/sih-2023-hardware-edition-additive-manufacturing.pdf	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Students to use Autodesk Fusion 360 to research and redesign a conventional automotive component commonly found in vehic using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_178	Similar Document Template Matching Algorithm	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Similar Document Template Matching Algorithm using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_179	An application under which all rescue agencies are registered and which can display the location of other rescue relief agencies during natural/ man made calamities	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for An application under which all rescue agencies are registered and which can display the location of other rescue relief using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_180	Robotics Device for Borewell Rescue Operation	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Robotics Device for Borewell Rescue Operation using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_181	Virtual Reality-Based Training for CBRN Disaster Response	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Virtual Reality-Based Training for CBRN Disaster Response using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_182	Development of suitable Software and Hardware components/sensors for springshd mapping, monitoring and management.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Development of suitable Software and Hardware components/sensors for springshd mapping, monitoring and management using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_183	Number of persons benefitted from using the Water Harvesting Structures (WHS) created / rejuvenated in the project areas under WDC 2.0 for economic activities like fisheries etc for alternate source of income generation.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Number of persons benefitted from using the Water Harvesting Structures (WHS) created / rejuvenated in the project areas using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_184	Developing an algorithm / programme to measure increase in income of FPOs on account of project interventions under WDC 2.0.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Developing an algorithm / programme to measure increase in income of FPOs on account of project interventions under WDC using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_185	Making career choices and AI based counselling accessible to every child at secondary level along with aptitude tests and detailed career paths.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Making career choices and AI based counselling accessible to every child at secondary level along with aptitude tests an using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_186	Mental health and well-being surveillance, assessment and tracking solution among children.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Mental health and well-being surveillance, assessment and tracking solution among children using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_187	Identify slow learners for remedial teaching and capacity building for innovative methods.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Identify slow learners for remedial teaching and capacity building for innovative methods using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_188	Online personalized learning remediation/tutoring tool. Search for best teacher for specific topics.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Online personalized learning remediation/tutoring tool. Search for best teacher for specific topics using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_189	Lowest Cost Smart Board - A Seamless Teaching Experience.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Lowest Cost Smart Board - A Seamless Teaching Experience using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_190	Develop a solution to identifio discrepancies in Quality Monitoring Data on OMMAS and generate reports that highlight areas where corrective action is Required.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Develop a solution to identifio discrepancies in Quality Monitoring Data on OMMAS and generate reports that highlight are using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_191	AR/VR based application which helps visualize the complete house virtually at an early stage, which can help in cost estimation, planning and completion of the house in time'	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for AR/VR based application which helps visualize the complete house virtually at an early stage, which can help in cost est using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_192	Call for Toilet technology	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Call for Toilet technology using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_193	Technological solutions for safe disposal of menstrual waste	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Technological solutions for safe disposal of menstrual waste using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_194	Technological solutions for Early decomposition of fecal matter	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Technological solutions for Early decomposition of fecal matter using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_195	Call for low-cost desalination technology for Lakshadweep and Inland saline water sources.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Call for low-cost desalination technology for Lakshadweep and Inland saline water sources using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_196	Web /Mobile based tool for mapping of Water supply network	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Web /Mobile based tool for mapping of Water supply network using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_197	Devise the method for identification of victims buried under avalanches.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Devise the method for identification of victims buried under avalanches using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_198	Novel Technologies for Early Detection and Mitigation of Avalanches	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Novel Technologies for Early Detection and Mitigation of Avalanches using modern technologies to improve performance, automation, security, scalability, and real-world usability.

PRJ_199	Lean module for reasoning about computational complexity in GPTs.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Lean module for reasoning about computational complexity in GPTs using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_200	Robust human target detection and acquisition	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Robust human target detection and acquisition using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_201	Deep learning for terrain recognition	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Deep learning for terrain recognition using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_202	AI-ML based intelligent de-smoking/de-hazing algorithm	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for AI-ML based intelligent de-smoking/de-hazing algorithm using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_203	AI based Automatic alarm generation and dropping of payload at a particular object through a Drone.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for AI based Automatic alarm generation and dropping of payload at a particular object through a Drone using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_204	Development of motion amplification video techniques for vibration analysis	Video Processing	SDG9	Design and develop a solution for Development of motion amplification video techniques for vibration analysis using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_205	Drone based Intelligent Magnetic sensing system and Metallic anomaly detection system	Drone Technology	SDG9	Design and develop a solution for Drone based Intelligent Magnetic sensing system and Metallic anomaly detection system using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_206	Dak Ghar Niryat Kendra	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Dak Ghar Niryat Kendra using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_207	Data Compression for backbone network	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Data Compression for backbone network using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_208	Simulator system for counter Hijack and sky Marshalling operations	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Simulator system for counter Hijack and sky Marshalling operations using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_209	Augmented/ Virtual reality system for the live training of troops	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Augmented/ Virtual reality system for the live training of troops using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_210	AI based IT training system	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for AI based IT training system using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_211	IT System log analyzer	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for IT System log analyzer using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_212	Chatbot based helpdesk for govt employees and departments	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Chatbot based helpdesk for govt employees and departments using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_213	Development of Augmentative and Alternative Communication (AAC) in Indian context	Wireless Communication	SDG9	Design and develop a solution for Development of Augmentative and Alternative Communication (AAC) in Indian context using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_214	Develop therapy materials in Hindi for misarticulation children	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Develop therapy materials in Hindi for misarticulation children using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_215	Low-cost Myoelectric Prosthetic Arm	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Low-cost Myoelectric Prosthetic Arm using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_216	APP Based Digital Audiometer	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for APP Based Digital Audiometer using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_217	Ear Electronic Device for Tinnitus Frequency Finding and Adjusting to Provide Relief to Tinnitus Suffering Patient	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Ear Electronic Device for Tinnitus Frequency Finding and Adjusting to Provide Relief to Tinnitus Suffering Patient using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_218	Virtual Zoo	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Virtual Zoo using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_219	Water and Electricity Tracking App	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Water and Electricity Tracking App using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_220	E-Waste Facility Locator	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for E-Waste Facility Locator using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_221	Behavioural change monitoring software	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Behavioural change monitoring software using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_222	Pro Planet Person App	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Pro Planet Person App using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_223	To develop centralised information security .Log-collection facility' or 'security operation centre (soc)' in the power sector, considering cEA cybersecurity (Power sector) Guidelines, 2021 to keep Ir and or networking System isolated and air-	Cybersecurity, AI/ML, Artificial Intel	SDG9, SDG16	Design and develop a solution for To develop centralised information security .Log-collection facility' or 'security operation centre (soc)' in the power using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_224	Detection of Malware/ Trojan in softwares used in Power Sector.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Detection of Malware/ Trojan in softwares used in Power Sector using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_225	Detection of embedded Malware/ Trojan in hardware devices used in Power Sector.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Detection of embedded Malware/ Trojan in hardware devices used in Power Sector using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_226	Developing a software for dubbing of videos from English to other Indian regional languages.	Video Processing	SDG9	Design and develop a solution for Developing a software for dubbing of videos from English to other Indian regional languages using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_227	Developing a software that can translate resource material and other texts from English to other Indian regional languages.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Developing a software that can translate resource material and other texts from English to other Indian regional languages using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_228	Developing an interactive gaming software / mobile application on Intellectual Property Awareness for school students	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Developing an interactive gaming software / mobile application on Intellectual Property Awareness for school students using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_229	Optimizing Doctor Availability and Appointment Allocation in Hospitals through Digital Technology and AI Integration.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Optimizing Doctor Availability and Appointment Allocation in Hospitals through Digital Technology and AI Integration using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_230	Real-Time Vehicle Tracking system.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Real-Time Vehicle Tracking system using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_231	Analysis and identification of malicious mobile applications	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Analysis and identification of malicious mobile applications using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_232	Intelligent chatbot to answer queries pertaining to various Maintenance Processes within Substation	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Intelligent chatbot to answer queries pertaining to various Maintenance Processes within Substation using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_233	Vegetation measurement along the line corridor using satellite imagery	Computer Vision	SDG9	Design and develop a solution for Vegetation measurement along the line corridor using satellite imagery using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_234	Segregating and information on regulatory / Gofi. PolicieVGuidelines/Office Memoranda etc. related to Contract and Procurement issues for proper compliance and reporting of the same.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Segregating and information on regulatory / Gofi. PolicieVGuidelines/Office Memoranda etc. related to Contract and Procurement issues for proper compliance and reporting of the same using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_235	Creation of Live Digital Twins for the power Projects and integration with all existing monitoring and database system which will give a holistic real time approach to the project and plant from all aspect of construction, operation and	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Creation of Live Digital Twins for the power Projects and integration with all existing monitoring and database system w using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_236	Robotics for inspection of abrasion / corrosion of underwater equipment / parts and further repair and maintenance	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Robotics for inspection of abrasion / corrosion of underwater equipment / parts and further repair and maintenance using modern technologies to improve performance, automation, security, scalability, and real-world usability.

PRJ_237	Geo tagging of plantation in the catchment area of hydro project	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Geo tagging of plantation in the catchment area of hydro project using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_238	Cloudburst prediction system	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Cloudburst prediction system using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_239	One-stop solution for monitoring dairy plant energy consumption, hygiene and packaging waste collection from consumers.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for One-stop solution for monitoring dairy plant energy consumption, hygiene and packaging waste collection from consumers using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_240	development of systems for effective Environmental, Social and Governance (ESG) Intervention in Higher Education	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for development of systems for effective Environmental, Social and Governance (ESG) Intervention in Higher Education using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_241	Community Based Reporting and Monitoring Tool for Women's Safety in Colleges/Universities.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Community Based Reporting and Monitoring Tool for Women's Safety in Colleges/Universities using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_242	Real time monitoring of infrastructure development	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Real time monitoring of infrastructure development using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_243	Online integrated platform for projects taken up by the students of various universities/colleges	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Online integrated platform for projects taken up by the students of various universities/colleges using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_244	Despite prohibition of hazardous cleaning of sewers and septic tanks (manual cleaningof sewers and septic tanks without safety kits, safety devices and without adherence to safety precautions) it is still being resorted to in many parts of the	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Despite prohibition of hazardous cleaning of sewers and septic tanks (manual cleaningof sewers and septic tanks without using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_245	To develop a technical solution for enabling Institution level verification of students of one State studying in other State/s, who are at present generally denied benefits under the Scholarship scheme as the Institutions in which they are studying are not registered on the portal/s of their home State.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for To develop a technical solution for enabling Institution level verification of students of one State studying in other S using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_246	Centralised Nasha Mukti Database	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Centralised Nasha Mukti Database using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_247	Online Blockchain based certificate generation and validation system for government organization.	Artificial Intelligence, Machine Learn	SDG9, SDG16	Design and develop a solution for Online Blockchain based certificate generation and validation system for government organization using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_248	Fake Social Media Profile detection and reporting	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Fake Social Media Profile detection and reporting using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_249	Self-identifying the mental health status and get guidance for support.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Self-identifying the mental health status and get guidance for support using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_250	Student dropout analysis for school education	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Student dropout analysis for school education using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_251	Development of Small Scale Wind energy device	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Development of Small Scale Wind energy device using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_252	Price comparison of GeM products with other e-marketplaces	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Price comparison of GeM products with other e-marketplaces using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_253	Contact center knowledge management tool with decision tree	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Contact center knowledge management tool with decision tree using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_254	Image correctness for a product on marketplace	Computer Vision	SDG9	Design and develop a solution for Image correctness for a product on marketplace using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_255	Sentiment analysis of Social Media presence	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Sentiment analysis of Social Media presence using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_256	Sentiment Analysis of Incoming calls on helpdesk	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Sentiment Analysis of Incoming calls on helpdesk using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_257	Using existing CCTV network for crowd management, crime prevention, and work monitoring using AI/ML	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Using existing CCTV network for crowd management, crime prevention, and work monitoring using AI/ML using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_258	Natural language translation engine for announcements and information dissemination at stations	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Natural language translation engine for announcements and information dissemination at stations using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_259	A software that suggests drugs and formulations for a disease/pharmacological property based on the Ayurvedic classical books/Repositories.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for A software that suggests drugs and formulations for a disease/pharmacological property based on the Ayurvedic classical using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_260	Chatbot to Known Individual Prakriti (Phenotype)	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Chatbot to Known Individual Prakriti (Phenotype) using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_261	Startup-AYUSH Portal	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Startup-AYUSH Portal using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_262	AI-based tool for preliminary diagnosis of Dermatological manifestations	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for AI-based tool for preliminary diagnosis of Dermatological manifestations using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_263	Identification of Different Medicinal Plants/Raw materials through Image Processing Using Machine Learning Algorithms	Computer Vision	SDG9	Design and develop a solution for Identification of Different Medicinal Plants/Raw materials through Image Processing Using Machine Learning Algorithms using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_264	Development of a prototype instrument (sensor based) for assessment and quantification of rasas (taste) in crude herbs.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Development of a prototype instrument (sensor based) for assessment and quantification of rasas (taste) in crude herbs using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_265	PG dissertation Management System Description.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for PG dissertation Management System Description using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_266	Application for Assessment of Quality of Textbook/ Reference Books/ E- Book	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Application for Assessment of Quality of Textbook/ Reference Books/ E- Book using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_267	Automation of drill core rock sample lithology logging.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Automation of drill core rock sample lithology logging using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_268	Unpredictable failure of poly pulleys along cable belt conveyor system for pulley changing	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Unpredictable failure of poly pulleys along cable belt conveyor system for pulley changing using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_269	unpredictable wear and tear of cable belt conveyor Rope and belt leading to frequent stoppage of single line Mine production system causing significant loss of production	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for unpredictable wear and tear of cable belt conveyor Rope and belt leading to frequent stoppage of single line Mine produc using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_270	Mines operation specially haulage of dumpers done through operators extended even in the absense in adequacy of operators.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Mines operation specially haulage of dumpers done through operators extended even in the absense in adequacy of operato using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_271	Difficulty in operating Heavy earth moving machineries during rainy season (4-5 months due to extremely poor visibility conditions leading to significant loss of excavation and production	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Difficulty in operating Heavy earth moving machineries during rainy season (4-5 months due to extremely poor visibility c using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_272	Software for intervention of speech sound disorders in Hindi and English.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Software for intervention of speech sound disorders in Hindi and English using modern technologies to improve performance, automation, security, scalability, and real-world usability.

PRJ_273	Udyog Saarthi App - (Progressive Web-based Application) for Adults undergoing Job coaching for opportunities under 4% reservation in NIEPMD and other Institutions.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Udyog Saarthi App - (Progressive Web-based Application) for Adults undergoing Job coaching for opportunities under 4% re using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_274	Hot metal, Steel Ladle, and Scrap pot Tracking by auto-capturing the Ladle number and locations at SMS-1 and SMS-2.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Hot metal, Steel Ladle, and Scrap pot Tracking by auto-capturing the Ladle number and locations at SMS-1 and SMS-2 using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_275	A complete Digital Marketing solution for visible increase in online sale of DPDA/AeAeAeA-AeAeAeA journals and Employment News issues through various available/new online sale channels (like website, apps, amazon, social media) by optimising various available or new digital marketing tools like email marketing, SEO, analytics, etc., subject to suitability, sustainability and cost-effectiveness.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for A complete Digital Marketing solution for visible increase in online sale of DPDA/AeAeAeA-AeAeAeA journals and Employom using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_276	Text to Video of various PIB Press Releases using Artificial Intelligence / Machine Learning / Generative Adversarial Networks in English and 13 Regional Languages viz. Hindi, Urdu, Punjabi, Gujarati, Marathi, Telugu, Kannada, Malayalam, Tamil, Odia, Bengali, Assamese and Manipuri.	Video Processing	SDG9	Design and develop a solution for Text to Video of various PIB Press Releases using Artificial Intelligence / Machine Learning / Generative Adversarial Ne using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_277	360-degree feedback software for the Government of India related News Stories in Regional Media using Artificial Intelligence / Machine Learning	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for 360-degree feedback software for the Government of India related News Stories in Regional Media using Artificial Intelli using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_278	Call for cost-effective ways of making water source for piped drinking water supply sustainable in Rural areas	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Call for cost-effective ways of making water source for piped drinking water supply sustainable in Rural areas using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_279	Developing a system for Patient Care in the Health Sector	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Developing a system for Patient Care in the Health Sector using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_280	Ideate and implement a system to enhance the quality of education in rural areas.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Ideate and implement a system to enhance the quality of education in rural areas using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_281	AI Assisted Tele-medicine KIOSK for Rural India	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for AI Assisted Tele-medicine KIOSK for Rural India using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_282	Air and water quality index and environment monitoring	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Air and water quality index and environment monitoring using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_283	Development of Smart Toilet	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Development of Smart Toilet using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_284	Domestic Waste Management	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Domestic Waste Management using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_285	Compilation and Collection of optimum Level (variable) of data set from the Chemical and Petrochemical Industries in the country, aiming to smoothen the decision-making and insight generation in the strategic initiative.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Compilation and Collection of optimum Level (variable) of data set from the Chemical and Petrochemical Industries in the using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_286	In-cab smart guidance and support system for Dragline Operator	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for In-cab smart guidance and support system for Dragline Operator using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_287	Forecasting and scheduling of railway rakes.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Forecasting and scheduling of railway rakes using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_288	Analytics based on Govt. Land Information System(GLIS) Data	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Analytics based on Govt. Land Information System(GLIS) Data using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_289	Development of a Digital Platform for multi-modal visibility of coal transportation	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Development of a Digital Platform for multi-modal visibility of coal transportation using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_290	Application of Image Analytics for Tree enumeration for diversion of Forest Land.	Computer Vision	SDG9	Design and develop a solution for Application of Image Analytics for Tree enumeration for diversion of Forest Land using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_291	Development of a Telematic control unit for capturing vital data of a vehicle without using company fitted telemetry data port.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Development of a Telematic control unit for capturing vital data of a vehicle without using company fitted telemetry dat using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_292	Real-time visibility of Dumper load status to Shovel operator	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Real-time visibility of Dumper load status to Shovel operator using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_293	A system of IoT Devices to prevent under-loading / overloading of Railway wagons.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for A system of IoT Devices to prevent under-loading / overloading of Railway wagons using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_294	Chatbot to respond to text queries pertaining to various Acts, Rules, and Regulations applicable to Mining industries	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Chatbot to respond to text queries pertaining to various Acts, Rules, and Regulations applicable to Mining industries using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_295	Dredging Analysis and Decision Support System.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Dredging Analysis and Decision Support System using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_296	Drone-based surveillance system for the vessels plying in port areas and encroachments	Drone Technology	SDG9	Design and develop a solution for Drone-based surveillance system for the vessels plying in port areas and encroachments using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_297	Application Development for monitoring of wool from Farm to fabric	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Application Development for monitoring of wool from Farm to fabric using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_298	Threat zone of an explosion particularly in oil and gas handling industries or refineries	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Threat zone of an explosion particularly in oil and gas handling industries or refineries using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_299	Computerized cognitive Retraining Program for Home training of Children with Disabilities.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Computerized cognitive Retraining Program for Home training of Children with Disabilities using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_300	Active Prosthetic ankle and adaptive equipment for bike riding in lower limb amputees	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Active Prosthetic ankle and adaptive equipment for bike riding in lower limb amputees using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_301	The Employment Department at present has a digital platform www.pgrkam.com and its mobile application to provide almost all services offered to job seekers and employers through digital means. The portal has multiple modules like private sector jobs, government jobs, self-employment avenues, foreign jobs, foreign study, counseling, guidance, induction into armed forces, job melas, etc. Currently, when a user visits the portal/app, there is no hand-holding mechanism to help the user get to the part of the digital platform which will resolve his queries. The user is required to navigate across multiple modules on the portal/ app to search for answers.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for The Employment Department at present has a digital platform www.pgrkam.com and its mobile application to provide almost using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_302	PGRKAM web application (www.pgrkam.com) and the PGRKAM Android application of the Punjab Government provides employment data to the prospective candidates. The platform has a sizeable number of user base but it lacks integrated analytics tools to understand how the users are consuming the information.	Mobile App Development	SDG9	Design and develop a solution for PGRKAM web application (www.pgrkam.com) and the PGRKAM Android application of the Punjab Government provides employment using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_303	PGRKAM web application (www.pgrkam.com) and the PGRKAM Android application of the Punjab Government provides employment data to the prospective candidates.	Mobile App Development	SDG9	Design and develop a solution for PGRKAM web application (www.pgrkam.com) and the PGRKAM Android application of the Punjab Government provides employment using modern technologies to improve performance, automation, security, scalability, and real-world usability.

PRJ_304	Design of CYBER-SECURITY ENABLED SMART CONTROLLER for grid-connected Microgrid	Cybersecurity, AI/ML	SDG9, SDG16	Design and develop a solution for Design of CYBER-SECURITY ENABLED SMART CONTROLLER for grid-connected Microgrid using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_305	Language translator tool to convert English to Hindi (official Language) which can be used by all the government organizations websites officially.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Language translator tool to convert English to Hindi (official Language) which can be used by all the government organiz using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_306	Automated Public Lighting	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Automated Public Lighting using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_307	Developing an AI-powered energy management system for industrial commercial facilities to optimize energy consumption.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Developing an AI-powered energy management system for industrial commercial facilities to optimize energy consumption using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_308	Monitoring through AI Based Remote Access Vehicle	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Monitoring through AI Based Remote Access Vehicle using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_309	AI Based Drone Application	Drone Technology	SDG9	Design and develop a solution for AI Based Drone Application using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_310	AI-based Generative design of Hydro power plants.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for AI-based Generative design of Hydro power plants using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_311	Dashboard for real-time monitoring of construction projects.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Dashboard for real-time monitoring of construction projects using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_312	Estimation of inflow to a reservoir from the rainfall considering soil moisture in its catchment and releases from upstream reservoirs and automatically opening of reservoir gates for moderately releasing the water to avoid the flooding	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Estimation of inflow to a reservoir from the rainfall considering soil moisture in its catchment and releases from upstr using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_313	Automatic regulation of valves for release of water based upon soil moisture availability in the root zone of the crop, using artificial intelligence, in a piped and micro irrigation network of irrigation system.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Automatic regulation of valves for release of water based upon soil moisture availability in the root zone of the crop. using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_314	AI-enabled water well predictor	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for AI-enabled water well predictor using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_315	A mobile app that crowd sources water-related problems from around a community, open sources data, etc. and display them on a map.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for A mobile app that crowd sources water-related problems from around a community, open sources data, etc. and display them using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_316	Development of AI, ML and Chat boat-powered Interactive Robot Mascot (Chacha Chaudhary) and digital avatar to strengthen the river people connect component of Namami Gange.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Development of AI, ML and Chat boat-powered Interactive Robot Mascot (Chacha Chaudhary) and digital avatar to strengthen using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_317	Projection of the extent of inundation corresponding to the forecasts of flood levels in a river.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Projection of the extent of inundation corresponding to the forecasts of flood levels in a river using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_318	Use of Digital Technology in addressing Non-Revenue Water (NRW)	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Use of Digital Technology in addressing Non-Revenue Water (NRW) using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_319	Use of Digital Technology to calculate water footprints for different daily use items.	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Use of Digital Technology to calculate water footprints for different daily use items using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_320	Incentives based Design for onboarding Legal Service Providers such as Advocates, Arbitrators, Mediators, Notaries, Document Writers, etc on eMarket Place for extending Legal Services to Citizens in India	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Incentives based Design for onboarding Legal Service Providers such as Advocates, Arbitrators, Mediators, Notaries, Docu using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_321	AI-powered Legal Documentation Assistant	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for AI-powered Legal Documentation Assistant using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_322	Developing a Blockchain-Based eVault for Legal Records	Artificial Intelligence, Machine Learn	SDG9, SDG16	Design and develop a solution for Developing a Blockchain-Based eVault for Legal Records using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_323	Digital Assistant for Legal Awareness and Designing a KYR Know-Your-Rights framework in India	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Digital Assistant for Legal Awareness and Designing a KYR Know-Your-Rights framework in India using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_324	Tech-Driven Solutions for Undertrial Prisoners in India	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Tech-Driven Solutions for Undertrial Prisoners in India using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_325	Development of gamified platform on Children's Rights to increase legal literacy and awareness among children in India	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Development of gamified platform on Children's Rights to increase legal literacy and awareness among children in India using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_326	Development of e-Portal for facilitating Case Management Hearing of various types of cases	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for Development of e-Portal for facilitating Case Management Hearing of various types of cases using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_327	Development of software for streamlining the listing of cases through Differentiated Case Flow Management	Artificial Intelligence, Machine Learn	SDG9	Design and develop a solution for Development of software for streamlining the listing of cases through Differentiated Case Flow Management using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_328	International Comparative System to Launch Integrated Real-Time Data Management System (IDMS) for Chemical and Petrochemicals Sector.	Artificial Intelligence, Cloud Comput	SDG9	Design and develop a solution for International Comparative System to Launch Integrated Real-Time Data Management System (IDMS) for Chemical and Petrochem using modern technologies to improve performance, automation, security, scalability, and real-world usability.
PRJ_329	AI-Based Soil Nutrient Deficiency Detection System	Machine Learning, IoT, Image Proces	SDG 2	A solution designed to address 'ai-based soil nutrient deficiency detection system' using machine learning, iot, image processing to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_330	Smart Irrigation Using Weather Prediction and IoT Sensors	IoT, Weather APIs, Predictive Analyt	SDG 2	A solution designed to address 'smart irrigation using weather prediction and iot sensors' using iot, weather apis, predictive analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_331	Crop Disease Identification Using Computer Vision	Deep Learning, Computer Vision	SDG 2	A solution designed to address 'crop disease identification using computer vision' using deep learning, computer vision to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_332	Farm Produce Price Prediction Platform	Machine Learning, Time-Series Anal	SDG 2	A solution designed to address 'farm produce price prediction platform' using machine learning, time-series analysis to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_333	Smart Fertilizer Recommendation Engine	AI, Data Analytics	SDG 2	A solution designed to address 'smart fertilizer recommendation engine' using ai, data analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_334	Livestock Health Monitoring Using Wearable Sensors	Wearable IoT, Predictive Analytics	SDG 2	A solution designed to address 'livestock health monitoring using wearable sensors' using wearable iot, predictive analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_335	Automated Pest Detection and Alert System	Computer Vision, AI, IoT	SDG 2	A solution designed to address 'automated pest detection and alert system' using computer vision, ai, iot to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_336	Cold-Chain Monitoring for Agricultural Transportation	IoT, GPS, Cloud Analytics	SDG 2	A solution designed to address 'cold-chain monitoring for agricultural transportation' using iot, gps, cloud analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_337	Drone-Based Crop Health Assessment System	Drone Imaging, GIS, Deep Learning	SDG 2	A solution designed to address 'drone-based crop health assessment system' using drone imaging, gis, deep learning to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_338	Rural Water Quality Monitoring Platform	IoT Sensors, Data Analytics	SDG 6	A solution designed to address 'rural water quality monitoring platform' using iot sensors, data analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_339	AI-Assisted Early Disease Prediction Platform	Machine Learning, Healthcare Analyt	SDG 9	A solution designed to address 'ai-assisted early disease prediction platform' using machine learning, healthcare analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.

PRJ_340	Remote Patient Monitoring System	IoT Wearables, Cloud Computing	SDG 3	A solution designed to address 'remote patient monitoring system' using iot wearables, cloud computing to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_341	Smart Medicine Reminder and Compliance Tracker	Mobile Apps, IoT	SDG 3	A solution designed to address 'smart medicine reminder and compliance tracker' using mobile apps, iot to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_342	Low-Cost Telemedicine Platform	WebRTC, Cloud Computing	SDG 3	A solution designed to address 'low-cost telemedicine platform' using webrtc, cloud computing to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_343	AI-Powered Medical Image Analysis Tool	Deep Learning, Image Processing	SDG 3	A solution designed to address 'ai-powered medical image analysis tool' using deep learning, image processing to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_344	Hospital Bed Availability Tracking System	Cloud Database, IoT	SDG 3	A solution designed to address 'hospital bed availability tracking system' using cloud database, iot to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_345	Wearable Health Monitoring Band	Embedded Systems, IoT	SDG 3	A solution designed to address 'wearable health monitoring band' using embedded systems, iot to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_346	Smart Ambulance Routing System	GPS, GIS, AI	SDG 3	A solution designed to address 'smart ambulance routing system' using gps, gis, ai to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_347	Mental Health Chatbot for Students	NLP, Generative AI	SDG 3	A solution designed to address 'mental health chatbot for students' using nlp, generative ai to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_348	Healthcare Appointment Management Platform	Cloud Computing, Mobile Apps	SDG 3	A solution designed to address 'healthcare appointment management platform' using cloud computing, mobile apps to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_349	Personalized Learning Recommendation Engine	Machine Learning, Learning Analytics	SDG 4	A solution designed to address 'personalized learning recommendation engine' using machine learning, learning analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_350	AI-Based Student Performance Prediction System	Machine Learning, Data Mining	SDG 4	A solution designed to address 'ai-based student performance prediction system' using machine learning, data mining to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_351	Virtual Laboratory for Engineering Experiments	AR/VR, Simulation	SDG 4	A solution designed to address 'virtual laboratory for engineering experiments' using ar/vr, simulation to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_352	Skill-Gap Analysis Platform for Students	AI, Recommendation Systems	SDG 4	A solution designed to address 'skill-gap analysis platform for students' using ai, recommendation systems to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_353	Smart Attendance Monitoring System	Face Recognition, Computer Vision	SDG 4	A solution designed to address 'smart attendance monitoring system' using face recognition, computer vision to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_354	AI-Based Coding Mentor Platform	Generative AI, NLP	SDG 4	A solution designed to address 'ai-based coding mentor platform' using generative ai, nlp to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_355	AR-Based Learning Application	AR, Mobile Computing	SDG 4	A solution designed to address 'ar-based learning application' using ar, mobile computing to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_356	Career Guidance Platform Using AI	Machine Learning, Analytics	SDG 4	A solution designed to address 'career guidance platform using ai' using machine learning, analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_357	Student Project Collaboration Platform	Cloud Computing, Web Technologies	SDG 4	A solution designed to address 'student project collaboration platform' using cloud computing, web technologies to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_358	Adaptive Online Examination System	AI, Web Technologies	SDG 4	A solution designed to address 'adaptive online examination system' using ai, web technologies to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_359	Smart Parking Management System	IoT, Mobile Apps	SDG 11	A solution designed to address 'smart parking management system' using iot, mobile apps to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_360	Intelligent Traffic Signal Optimization	AI, Computer Vision	SDG 11	A solution designed to address 'intelligent traffic signal optimization' using ai, computer vision to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_361	Waste Segregation Monitoring Using AI	Computer Vision, Deep Learning	SDG 12	A solution designed to address 'waste segregation monitoring using ai' using computer vision, deep learning to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_362	Smart Streetlight Energy Management	IoT, Energy Analytics	SDG 7	A solution designed to address 'smart streetlight energy management' using iot, energy analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_363	Urban Flood Prediction and Alert System	Machine Learning, GIS	SDG 11	A solution designed to address 'urban flood prediction and alert system' using machine learning, gis to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_364	Smart Public Complaint Tracking Platform	Cloud Computing, Mobile Apps	SDG 11	A solution designed to address 'smart public complaint tracking platform' using cloud computing, mobile apps to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_365	Noise Pollution Monitoring Network	IoT Sensors, Analytics	SDG 12	A solution designed to address 'noise pollution monitoring network' using iot sensors, analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_366	Smart Water Distribution Monitoring System	IoT, SCADA	SDG 6	A solution designed to address 'smart water distribution monitoring system' using iot, scada to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_367	Emergency Response Coordination Platform	GIS, Cloud Computing	SDG 9	A solution designed to address 'emergency response coordination platform' using gis, cloud computing to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_368	Air Quality Monitoring and Prediction System	IoT, Machine Learning	SDG 12	A solution designed to address 'air quality monitoring and prediction system' using iot, machine learning to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_369	Carbon Footprint Tracking Application	Data Analytics, Mobile Apps	SDG 12	A solution designed to address 'carbon footprint tracking application' using data analytics, mobile apps to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_370	Plastic Waste Collection Reward Platform	Blockchain, Mobile Apps	SDG 12	A solution designed to address 'plastic waste collection reward platform' using blockchain, mobile apps to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_371	Renewable Energy Monitoring Dashboard	IoT, Data Visualization	SDG 7	A solution designed to address 'renewable energy monitoring dashboard' using iot, data visualization to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_372	Smart E-Waste Management System	IoT, Cloud Computing	SDG 12	A solution designed to address 'smart e-waste management system' using iot, cloud computing to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_373	Water Conservation Analytics Platform	Data Analytics, IoT	SDG 6	A solution designed to address 'water conservation analytics platform' using data analytics, iot to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_374	AI-Based Garbage Classification System	Computer Vision, Deep Learning	SDG 12	A solution designed to address 'ai-based garbage classification system' using computer vision, deep learning to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_375	Smart Composting Management Solution	IoT, Sensors	SDG 12	A solution designed to address 'smart composting management solution' using iot, sensors to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_376	Energy-Efficient Building Monitoring Platform	IoT, Energy Analytics	SDG 7	A solution designed to address 'energy-efficient building monitoring platform' using iot, energy analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_377	Green Mobility Recommendation Application	AI, GIS	SDG 11	A solution designed to address 'green mobility recommendation application' using ai, gis to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_378	Climate Risk Prediction Platform	Machine Learning, Big Data	SDG 12	A solution designed to address 'climate risk prediction platform' using machine learning, big data to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_379	Multilingual AI Chatbot for Citizen Services	NLP, Generative AI	SDG 9	A solution designed to address 'multilingual ai chatbot for citizen services' using nlp, generative ai to improve efficiency, decision-making, monitoring, automation, and user outcomes.

PRJ_380	Fake News Detection Platform	Machine Learning, NLP	SDG 9	A solution designed to address 'fake news detection platform' using machine learning, nlp to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_381	AI-Powered Resume Screening System	NLP, Machine Learning	SDG 9	A solution designed to address 'ai-powered resume screening system' using nlp, machine learning to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_382	Customer Sentiment Analysis Dashboard	NLP, Data Analytics	SDG 9	A solution designed to address 'customer sentiment analysis dashboard' using nlp, data analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_383	AI Document Summarization Platform	Generative AI, NLP	SDG 9	A solution designed to address 'ai document summarization platform' using generative ai, nlp to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_384	Speech-to-Text System for Indian Languages	Deep Learning, NLP	SDG 9	A solution designed to address 'speech-to-text system for indian languages' using deep learning, nlp to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_385	AI-Based Recruitment Recommendation Engine	Machine Learning, Analytics	SDG 9	A solution designed to address 'ai-based recruitment recommendation engine' using machine learning, analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_386	Predictive Maintenance Platform for Industries	IoT, Machine Learning	SDG 9	A solution designed to address 'predictive maintenance platform for industries' using iot, machine learning to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_387	Intelligent Recommendation System for E-Commerce	Recommendation Systems, AI	SDG 9	A solution designed to address 'intelligent recommendation system for e-commerce' using recommendation systems, ai to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_388	AI-Powered Fraud Detection Platform	Machine Learning, Data Analytics	SDG 16	A solution designed to address 'ai-powered fraud detection platform' using machine learning, data analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_389	Phishing Detection Browser Extension	Cybersecurity, Machine Learning	SDG 16	A solution designed to address 'phishing detection browser extension' using cybersecurity, machine learning to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_390	AI-Driven Network Intrusion Detection System	AI, Network Security	SDG 9	A solution designed to address 'ai-driven network intrusion detection system' using ai, network security to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_391	Secure Digital Identity Verification Platform	Blockchain, Cybersecurity	SDG 16	A solution designed to address 'secure digital identity verification platform' using blockchain, cybersecurity to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_392	Cyber Threat Intelligence Dashboard	Big Data, Cybersecurity	SDG 16	A solution designed to address 'cyber threat intelligence dashboard' using big data, cybersecurity to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_393	Ransomware Detection and Recovery System	Machine Learning, Security	SDG 16	A solution designed to address 'ransomware detection and recovery system' using machine learning, security to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_394	Secure File Sharing Platform	Cryptography, Cloud Computing	SDG 9	A solution designed to address 'secure file sharing platform' using cryptography, cloud computing to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_395	Privacy-Preserving Data Sharing Solution	Blockchain, Encryption	SDG 16	A solution designed to address 'privacy-preserving data sharing solution' using blockchain, encryption to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_396	Endpoint Security Monitoring System	Cybersecurity, Analytics	SDG 16	A solution designed to address 'endpoint security monitoring system' using cybersecurity, analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_397	Cybersecurity Awareness Training Platform	Web Technologies, Gamification	SDG 16	A solution designed to address 'cybersecurity awareness training platform' using web technologies, gamification to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_398	Blockchain-Based Authentication System	Blockchain, Security	SDG 16	A solution designed to address 'blockchain-based authentication system' using blockchain, security to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_399	Smart Public Transport Tracking System	GPS, Mobile Apps	SDG 11	A solution designed to address 'smart public transport tracking system' using gps, mobile apps to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_400	EV Charging Station Locator and Optimizer	GIS, Mobile Computing	SDG 7	A solution designed to address 'ev charging station locator and optimizer' using gis, mobile computing to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_401	Intelligent Ride-Sharing Platform	AI, Cloud Computing	SDG 11	A solution designed to address 'intelligent ride-sharing platform' using ai, cloud computing to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_402	Road Accident Prediction System	Machine Learning, GIS	SDG 11	A solution designed to address 'road accident prediction system' using machine learning, gis to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_403	Fleet Management Using IoT	IoT, GPS	SDG 11	A solution designed to address 'fleet management using iot' using iot, gps to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_404	Smart Logistics Route Optimization	AI, Operations Research	SDG 11	A solution designed to address 'smart logistics route optimization' using ai, operations research to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_405	Driver Fatigue Detection System	Computer Vision, AI	SDG 9	A solution designed to address 'driver fatigue detection system' using computer vision, ai to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_406	Traffic Congestion Prediction Platform	Machine Learning, Big Data	SDG 11	A solution designed to address 'traffic congestion prediction platform' using machine learning, big data to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_407	Autonomous Parking Assistance System	Computer Vision, Embedded Systems	SDG 11	A solution designed to address 'autonomous parking assistance system' using computer vision, embedded systems to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_408	Smart Fuel Consumption Monitoring Platform	IoT, Analytics	SDG 9	A solution designed to address 'smart fuel consumption monitoring platform' using iot, analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_409	AI-Based Personal Finance Advisor	Machine Learning, FinTech	SDG 8	A solution designed to address 'ai-based personal finance advisor' using machine learning, fintech to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_410	Digital Lending Risk Assessment Platform	AI, Credit Analytics	SDG 8	A solution designed to address 'digital lending risk assessment platform' using ai, credit analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_411	Financial Literacy Mobile Application	Mobile Computing, Gamification	SDG 9	A solution designed to address 'financial literacy mobile application' using mobile computing, gamification to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_412	Fraud Detection in Digital Payments	Machine Learning, Cybersecurity	SDG 16	A solution designed to address 'fraud detection in digital payments' using machine learning, cybersecurity to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_413	MSME Credit Scoring Platform	AI, Data Analytics	SDG 8	A solution designed to address 'msme credit scoring platform' using ai, data analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_414	Smart Budgeting Application	Mobile Apps, Analytics	SDG 8	A solution designed to address 'smart budgeting application' using mobile apps, analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_415	Rural Digital Banking Platform	Cloud Computing, FinTech	SDG 8	A solution designed to address 'rural digital banking platform' using cloud computing, fintech to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_416	Blockchain-Based Microfinance System	Blockchain, FinTech	SDG 8	A solution designed to address 'blockchain-based microfinance system' using blockchain, fintech to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_417	Expense Tracking and Analytics Application	Mobile Apps, Analytics	SDG 9	A solution designed to address 'expense tracking and analytics application' using mobile apps, analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_418	Automated Tax Assistance Platform	AI, NLP	SDG 8	A solution designed to address 'automated tax assistance platform' using ai, nlp to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_419	Smart Factory Monitoring Dashboard	IoT, Industry 4.0	SDG 9	A solution designed to address 'smart factory monitoring dashboard' using iot, industry 4.0 to improve efficiency, decision-making, monitoring, automation, and user outcomes.

PRJ_420	Predictive Machine Maintenance System	Machine Learning, IoT	SDG 9	A solution designed to address 'predictive machine maintenance system' using machine learning, iot to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_421	Industrial Safety Monitoring Platform	Computer Vision, IoT	SDG 9	A solution designed to address 'industrial safety monitoring platform' using computer vision, iot to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_422	Digital Twin for Manufacturing Processes	Digital Twin, Simulation	SDG 9	A solution designed to address 'digital twin for manufacturing processes' using digital twin, simulation to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_423	AI-Based Quality Inspection System	Computer Vision, Deep Learning	SDG 9	A solution designed to address 'ai-based quality inspection system' using computer vision, deep learning to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_424	Warehouse Automation and Tracking System	RFID, IoT	SDG 9	A solution designed to address 'warehouse automation and tracking system' using rfid, iot to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_425	Inventory Demand Forecasting Platform	Machine Learning, Forecasting	SDG 9	A solution designed to address 'inventory demand forecasting platform' using machine learning, forecasting to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_426	Industrial Energy Optimization System	IoT, Analytics	SDG 7	A solution designed to address 'industrial energy optimization system' using iot, analytics to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_427	Worker Safety Wearable Monitoring System	Wearables, IoT	SDG 9	A solution designed to address 'worker safety wearable monitoring system' using wearables, iot to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_428	Smart Production Planning and Scheduling Platform	AI, Optimization	SDG 9	A solution designed to address 'smart production planning and scheduling platform' using ai, optimization to improve efficiency, decision-making, monitoring, automation, and user outcomes.
PRJ_429	Problem Title	Technologies Used	Project Description	SDG mapping
PRJ_430	Community Health Worker Assistance Platform	Mobile Computing, AI Chatbots	SDG 3	A digital platform that assists community health workers in delivering healthcare services, tracking patients, and accessing medical information.
PRJ_431	Rural Maternal Health Monitoring System	IoT, Healthcare Analytics	SDG 3	An IoT-enabled system for monitoring maternal health indicators in rural areas to improve healthcare outcomes.
PRJ_432	Child Nutrition Tracking Platform	Data Analytics, Mobile Apps	SDG 2	A platform for monitoring child nutrition, growth, and dietary patterns using mobile and analytics tools.
PRJ_433	Smart Malnutrition Detection System	Machine Learning, Computer Vision	SDG 2	An AI-based solution that detects and predicts malnutrition risks using computer vision and machine learning.
PRJ_434	Low-Cost Telehealth Solution for Villages	Cloud Computing, WebRTC	SDG 3	An affordable telehealth platform that connects rural populations with healthcare professionals remotely.
PRJ_435	Mental Health Support Chatbot	NLP, Generative AI	SDG 3	An AI-powered chatbot providing mental health guidance, emotional support, and awareness resources.
PRJ_436	Women Safety Alert and Tracking System	GPS, Mobile Apps	SDG 5	A GPS-enabled safety solution that provides emergency alerts and real-time tracking for women.
PRJ_437	Domestic Violence Reporting Platform	Cloud Computing, Secure Communic	SDG 5	A secure digital platform for reporting domestic violence incidents and accessing support services.
PRJ_438	Menstrual Health Awareness Application	Mobile Apps, Analytics	SDG 3	A mobile application that promotes menstrual health awareness, education, and tracking.
PRJ_439	Smart Sanitation Monitoring System	IoT Sensors, Cloud Computing	SDG 6	An IoT-based system for monitoring sanitation facilities and improving public hygiene.
PRJ_440	Community Toilet Maintenance Tracker	IoT, Mobile Apps	SDG 6	A digital tracking system for monitoring and maintaining community sanitation facilities.
PRJ_441	Waterborne Disease Prediction System	Machine Learning, GIS	SDG 3	A predictive analytics system that identifies potential outbreaks of waterborne diseases.
PRJ_442	Clean Drinking Water Monitoring Platform	IoT, Analytics	SDG 6	An IoT-enabled platform for monitoring drinking water quality and ensuring safe access.
PRJ_443	Disaster Relief Resource Management System	GIS, Cloud Computing	SDG 11	A resource management platform for coordinating disaster relief operations efficiently.
PRJ_444	Humanitarian Aid Distribution Tracker	Blockchain, GPS	SDG 16	A blockchain-based tracking system that ensures transparency in humanitarian aid distribution.
PRJ_445	Emergency Shelter Allocation Platform	AI, Data Analytics	SDG 11	An AI-driven platform for optimizing emergency shelter allocation during crises.
PRJ_446	Refugee Assistance Information System	Mobile Apps, Cloud Computing	SDG 10	A digital information system that helps refugees access essential services and support.
PRJ_447	Conflict Zone Medical Supply Tracker	Blockchain, IoT	SDG 16	A blockchain and IoT-based solution for tracking medical supplies in conflict zones.
PRJ_448	Smart Food Distribution Platform	AI, Logistics Optimization	SDG 2	An intelligent logistics platform for optimizing food distribution and reducing waste.
PRJ_449	Community Hunger Mapping System	GIS, Data Analytics	SDG 2	A GIS-based platform for identifying hunger hotspots and supporting food security initiatives.
PRJ_450	Community Health Worker Assistance Platform	Mobile Computing, AI Chatbots	SDG 3	A digital platform that assists community health workers in delivering healthcare services, tracking patients, and accessing medical information.
PRJ_451	Rural Maternal Health Monitoring System	IoT, Healthcare Analytics	SDG 3	An IoT-enabled system for monitoring maternal health indicators in rural areas to improve healthcare outcomes.
PRJ_452	Child Nutrition Tracking Platform	Data Analytics, Mobile Apps	SDG 2	A platform for monitoring child nutrition, growth, and dietary patterns using mobile and analytics tools.
PRJ_453	Smart Malnutrition Detection System	Machine Learning, Computer Vision	SDG 2	An AI-based solution that detects and predicts malnutrition risks using computer vision and machine learning.
PRJ_454	Low-Cost Telehealth Solution for Villages	Cloud Computing, WebRTC	SDG 3	An affordable telehealth platform that connects rural populations with healthcare professionals remotely.
PRJ_455	Mental Health Support Chatbot	NLP, Generative AI	SDG 3	An AI-powered chatbot providing mental health guidance, emotional support, and awareness resources.
PRJ_456	Women Safety Alert and Tracking System	GPS, Mobile Apps	SDG 5	A GPS-enabled safety solution that provides emergency alerts and real-time tracking for women.
PRJ_457	Domestic Violence Reporting Platform	Cloud Computing, Secure Communic	SDG 5	A secure digital platform for reporting domestic violence incidents and accessing support services.
PRJ_458	Menstrual Health Awareness Application	Mobile Apps, Analytics	SDG 3	A mobile application that promotes menstrual health awareness, education, and tracking.
PRJ_459	Smart Sanitation Monitoring System	IoT Sensors, Cloud Computing	SDG 6	An IoT-based system for monitoring sanitation facilities and improving public hygiene.
PRJ_460	Community Toilet Maintenance Tracker	IoT, Mobile Apps	SDG 6	A digital tracking system for monitoring and maintaining community sanitation facilities.
PRJ_461	Waterborne Disease Prediction System	Machine Learning, GIS	SDG 3	A predictive analytics system that identifies potential outbreaks of waterborne diseases.
PRJ_462	Clean Drinking Water Monitoring Platform	IoT, Analytics	SDG 6	An IoT-enabled platform for monitoring drinking water quality and ensuring safe access.
PRJ_463	Disaster Relief Resource Management System	GIS, Cloud Computing	SDG 11	A resource management platform for coordinating disaster relief operations efficiently.
PRJ_464	Humanitarian Aid Distribution Tracker	Blockchain, GPS	SDG 16	A blockchain-based tracking system that ensures transparency in humanitarian aid distribution.
PRJ_465	Emergency Shelter Allocation Platform	AI, Data Analytics	SDG 11	An AI-driven platform for optimizing emergency shelter allocation during crises.
PRJ_466	Refugee Assistance Information System	Mobile Apps, Cloud Computing	SDG 10	A digital information system that helps refugees access essential services and support.
PRJ_467	Conflict Zone Medical Supply Tracker	Blockchain, IoT	SDG 16	A blockchain and IoT-based solution for tracking medical supplies in conflict zones.
PRJ_468	Smart Food Distribution Platform	AI, Logistics Optimization	SDG 2	An intelligent logistics platform for optimizing food distribution and reducing waste.
PRJ_469	Community Hunger Mapping System	GIS, Data Analytics	SDG 2	A GIS-based platform for identifying hunger hotspots and supporting food security initiatives.
PRJ_470	Community Health Worker Assistance Platform	Mobile Computing, AI Chatbots	SDG 3	A digital platform that assists community health workers in delivering healthcare services, tracking patients, and accessing medical information.
PRJ_471	Rural Maternal Health Monitoring System	IoT, Healthcare Analytics	SDG 3	An IoT-enabled system for monitoring maternal health indicators in rural areas to improve healthcare outcomes.
PRJ_472	Child Nutrition Tracking Platform	Data Analytics, Mobile Apps	SDG 2	A platform for monitoring child nutrition, growth, and dietary patterns using mobile and analytics tools.
PRJ_473	Smart Malnutrition Detection System	Machine Learning, Computer Vision	SDG 2	An AI-based solution that detects and predicts malnutrition risks using computer vision and machine learning.
PRJ_474	Low-Cost Telehealth Solution for Villages	Cloud Computing, WebRTC	SDG 3	An affordable telehealth platform that connects rural populations with healthcare professionals remotely.
PRJ_475	Mental Health Support Chatbot	NLP, Generative AI	SDG 3	An AI-powered chatbot providing mental health guidance, emotional support, and awareness resources.
PRJ_476	Women Safety Alert and Tracking System	GPS, Mobile Apps	SDG 5	A GPS-enabled safety solution that provides emergency alerts and real-time tracking for women.
PRJ_477	Domestic Violence Reporting Platform	Cloud Computing, Secure Communic	SDG 5	A secure digital platform for reporting domestic violence incidents and accessing support services.

PRJ_478	Menstrual Health Awareness Application	Mobile Apps, Analytics	SDG 3	A mobile application that promotes menstrual health awareness, education, and tracking.
PRJ_479	Smart Sanitation Monitoring System	IoT Sensors, Cloud Computing	SDG 6	An IoT-based system for monitoring sanitation facilities and improving public hygiene.
PRJ_480	Community Toilet Maintenance Tracker	IoT, Mobile Apps	SDG 6	A digital tracking system for monitoring and maintaining community sanitation facilities.
PRJ_481	Waterborne Disease Prediction System	Machine Learning, GIS	SDG 3	A predictive analytics system that identifies potential outbreaks of waterborne diseases.
PRJ_482	Clean Drinking Water Monitoring Platform	IoT, Analytics	SDG 6	An IoT-enabled platform for monitoring drinking water quality and ensuring safe access.
PRJ_483	Disaster Relief Resource Management System	GIS, Cloud Computing	SDG 11	A resource management platform for coordinating disaster relief operations efficiently.
PRJ_484	Humanitarian Aid Distribution Tracker	Blockchain, GPS	SDG 16	A blockchain-based tracking system that ensures transparency in humanitarian aid distribution.
PRJ_485	Emergency Shelter Allocation Platform	AI, Data Analytics	SDG 11	An AI-driven platform for optimizing emergency shelter allocation during crises.
PRJ_486	Refugee Assistance Information System	Mobile Apps, Cloud Computing	SDG 10	A digital information system that helps refugees access essential services and support.
PRJ_487	Conflict Zone Medical Supply Tracker	Blockchain, IoT	SDG 16	A blockchain and IoT-based solution for tracking medical supplies in conflict zones.
PRJ_488	Smart Food Distribution Platform	AI, Logistics Optimization	SDG 2	An intelligent logistics platform for optimizing food distribution and reducing waste.
PRJ_489	Community Hunger Mapping System	GIS, Data Analytics	SDG 2	A GIS-based platform for identifying hunger hotspots and supporting food security initiatives.
PRJ_490	Community Health Worker Assistance Platform	Mobile Computing, AI Chatbots	SDG 3	A digital platform that assists community health workers in delivering healthcare services, tracking patients, and accessing medical information.
PRJ_491	Rural Maternal Health Monitoring System	IoT, Healthcare Analytics	SDG 3	An IoT-enabled system for monitoring maternal health indicators in rural areas to improve healthcare outcomes.
PRJ_492	Child Nutrition Tracking Platform	Data Analytics, Mobile Apps	SDG 2	A platform for monitoring child nutrition, growth, and dietary patterns using mobile and analytics tools.
PRJ_493	Smart Malnutrition Detection System	Machine Learning, Computer Vision	SDG 2	An AI-based solution that detects and predicts malnutrition risks using computer vision and machine learning.
PRJ_494	Low-Cost Telehealth Solution for Villages	Cloud Computing, WebRTC	SDG 3	An affordable telehealth platform that connects rural populations with healthcare professionals remotely.
PRJ_495	Mental Health Support Chatbot	NLP, Generative AI	SDG 3	An AI-powered chatbot providing mental health guidance, emotional support, and awareness resources.
PRJ_496	Women Safety Alert and Tracking System	GPS, Mobile Apps	SDG 5	A GPS-enabled safety solution that provides emergency alerts and real-time tracking for women.
PRJ_497	Domestic Violence Reporting Platform	Cloud Computing, Secure Communication	SDG 5	A secure digital platform for reporting domestic violence incidents and accessing support services.
PRJ_498	Menstrual Health Awareness Application	Mobile Apps, Analytics	SDG 3	A mobile application that promotes menstrual health awareness, education, and tracking.
PRJ_499	Smart Sanitation Monitoring System	IoT Sensors, Cloud Computing	SDG 6	An IoT-based system for monitoring sanitation facilities and improving public hygiene.
PRJ_500	Community Toilet Maintenance Tracker	IoT, Mobile Apps	SDG 6	A digital tracking system for monitoring and maintaining community sanitation facilities.
PRJ_501	Waterborne Disease Prediction System	Machine Learning, GIS	SDG 3	A predictive analytics system that identifies potential outbreaks of waterborne diseases.
PRJ_502	Clean Drinking Water Monitoring Platform	IoT, Analytics	SDG 6	An IoT-enabled platform for monitoring drinking water quality and ensuring safe access.
PRJ_503	Disaster Relief Resource Management System	GIS, Cloud Computing	SDG 11	A resource management platform for coordinating disaster relief operations efficiently.
PRJ_504	Humanitarian Aid Distribution Tracker	Blockchain, GPS	SDG 16	A blockchain-based tracking system that ensures transparency in humanitarian aid distribution.
PRJ_505	Emergency Shelter Allocation Platform	AI, Data Analytics	SDG 11	An AI-driven platform for optimizing emergency shelter allocation during crises.
PRJ_506	Refugee Assistance Information System	Mobile Apps, Cloud Computing	SDG 10	A digital information system that helps refugees access essential services and support.
PRJ_507	Conflict Zone Medical Supply Tracker	Blockchain, IoT	SDG 16	A blockchain and IoT-based solution for tracking medical supplies in conflict zones.
PRJ_508	Smart Food Distribution Platform	AI, Logistics Optimization	SDG 2	An intelligent logistics platform for optimizing food distribution and reducing waste.
PRJ_509	Community Hunger Mapping System	GIS, Data Analytics	SDG 2	A GIS-based platform for identifying hunger hotspots and supporting food security initiatives.
PRJ_510	Community Health Worker Assistance Platform	Mobile Computing, AI Chatbots	SDG 3	A digital platform that assists community health workers in delivering healthcare services, tracking patients, and accessing medical information.
PRJ_511	Rural Maternal Health Monitoring System	IoT, Healthcare Analytics	SDG 3	An IoT-enabled system for monitoring maternal health indicators in rural areas to improve healthcare outcomes.
PRJ_512	Child Nutrition Tracking Platform	Data Analytics, Mobile Apps	SDG 2	A platform for monitoring child nutrition, growth, and dietary patterns using mobile and analytics tools.
PRJ_513	Smart Malnutrition Detection System	Machine Learning, Computer Vision	SDG 2	An AI-based solution that detects and predicts malnutrition risks using computer vision and machine learning.
PRJ_514	Low-Cost Telehealth Solution for Villages	Cloud Computing, WebRTC	SDG 3	An affordable telehealth platform that connects rural populations with healthcare professionals remotely.
PRJ_515	Mental Health Support Chatbot	NLP, Generative AI	SDG 3	An AI-powered chatbot providing mental health guidance, emotional support, and awareness resources.
PRJ_516	Women Safety Alert and Tracking System	GPS, Mobile Apps	SDG 5	A GPS-enabled safety solution that provides emergency alerts and real-time tracking for women.
PRJ_517	Domestic Violence Reporting Platform	Cloud Computing, Secure Communication	SDG 5	A secure digital platform for reporting domestic violence incidents and accessing support services.
PRJ_518	Menstrual Health Awareness Application	Mobile Apps, Analytics	SDG 3	A mobile application that promotes menstrual health awareness, education, and tracking.
PRJ_519	Smart Sanitation Monitoring System	IoT Sensors, Cloud Computing	SDG 6	An IoT-based system for monitoring sanitation facilities and improving public hygiene.
PRJ_520	Community Toilet Maintenance Tracker	IoT, Mobile Apps	SDG 6	A digital tracking system for monitoring and maintaining community sanitation facilities.
PRJ_521	Waterborne Disease Prediction System	Machine Learning, GIS	SDG 3	A predictive analytics system that identifies potential outbreaks of waterborne diseases.
PRJ_522	Clean Drinking Water Monitoring Platform	IoT, Analytics	SDG 6	An IoT-enabled platform for monitoring drinking water quality and ensuring safe access.
PRJ_523	Disaster Relief Resource Management System	GIS, Cloud Computing	SDG 11	A resource management platform for coordinating disaster relief operations efficiently.
PRJ_524	Humanitarian Aid Distribution Tracker	Blockchain, GPS	SDG 16	A blockchain-based tracking system that ensures transparency in humanitarian aid distribution.
PRJ_525	Emergency Shelter Allocation Platform	AI, Data Analytics	SDG 11	An AI-driven platform for optimizing emergency shelter allocation during crises.
PRJ_526	Refugee Assistance Information System	Mobile Apps, Cloud Computing	SDG 10	A digital information system that helps refugees access essential services and support.
PRJ_527	Conflict Zone Medical Supply Tracker	Blockchain, IoT	SDG 16	A blockchain and IoT-based solution for tracking medical supplies in conflict zones.
PRJ_528	Smart Food Distribution Platform	AI, Logistics Optimization	SDG 2	An intelligent logistics platform for optimizing food distribution and reducing waste.
PRJ_529	Community Hunger Mapping System	GIS, Data Analytics	SDG 2	A GIS-based platform for identifying hunger hotspots and supporting food security initiatives.
PRJ_530	AI-Driven Precision Agriculture System for Crop Health Monitoring and Yield Optimization	Cybersecurity, Web Technologies, Blockchain, Computer Vision	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_531	Smart Irrigation and Soil Nutrient Management Platform for Sustainable Farming	IoT, Machine Learning, Cloud Computing, Mobile App	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_532	Computer Vision Based Pest and Disease Detection System for Agricultural Crops	AI, Cloud Computing, Mobile App, Data Analytics	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_533	Integrated Farm Resource Planning and Agricultural Decision Support System	Deep Learning, Cloud Computing, Machine Learning, GIS	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_534	AI-Powered Remote Patient Monitoring and Predictive Healthcare Analytics Platform	Cybersecurity, Data Analytics, Mobile App, IoT	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_535	Smart Healthcare Management System for Rural and Underserved Communities	Big Data, Deep Learning, Mobile App, Data Analytics	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_536	Digital Disease Surveillance and Early Warning System for Public Health	Big Data, Computer Vision, Web Technologies, IoT	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_537	Intelligent Medical Diagnosis Assistance and Clinical Decision Support Platform	Blockchain, Mobile App, IoT, AI	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.

PRJ_538	Adaptive Learning and Personalized Student Performance Analytics Platform	Web Technologies, AI, Data Analytics, Cybersecurity	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_539	AI-Based Skill Assessment and Career Guidance System for Students	Machine Learning, IoT, Data Analytics, Blockchain	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_540	Smart Educational Resource Recommendation and Learning Management Platform	AI, GIS, IoT, Big Data	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_541	Digital Academic Performance Monitoring and Institutional Analytics System	Web Technologies, Deep Learning, Computer Vision, Machine Learning	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_542	Real-Time Women Safety Monitoring and Emergency Response Coordination Platform	Data Analytics, Computer Vision, Cloud Computing, Blockchain	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_543	AI-Enabled Personal Security and Threat Detection System for Women	IoT, Web Technologies, Machine Learning, Cybersecurity	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_544	Smart Community-Based Women Protection and Incident Reporting Platform	Deep Learning, Mobile App, GIS, Web Technologies	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_545	Geo-Fenced Emergency Alert and Safety Assistance System for Women	Mobile App, AI, Blockchain, IoT	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_546	Intelligent Water Quality Monitoring and Contamination Prediction System	AI, Cybersecurity, Cloud Computing, Web Technologies	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_547	Smart Water Resource Management and Distribution Optimization Platform	Cybersecurity, Deep Learning, GIS, IoT	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_548	IoT-Based Drinking Water Safety Assessment and Monitoring Framework	AI, Data Analytics, Machine Learning, Computer Vision	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_549	Integrated Watershed Monitoring and Sustainable Water Conservation System	AI, Mobile App, Big Data, Computer Vision	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_550	AI-Based Smart Energy Consumption Monitoring and Optimization Platform	Cloud Computing, Machine Learning, Big Data, Deep Learning	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_551	Renewable Energy Generation Forecasting and Grid Management System	Big Data, Web Technologies, Data Analytics, Cybersecurity	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_552	Intelligent Energy Efficiency Assessment and Carbon Reduction Framework	IoT, Cybersecurity, Machine Learning, Computer Vision	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_553	Smart Power Distribution Monitoring and Predictive Maintenance Platform	Web Technologies, AI, GIS, Machine Learning	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_554	Integrated Smart City Infrastructure Monitoring and Urban Analytics Platform	Machine Learning, Web Technologies, Blockchain, Mobile App	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_555	AI-Powered Urban Traffic Management and Mobility Optimization System	Computer Vision, Deep Learning, Web Technologies, AI	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_556	Smart Waste Management and Circular Economy Enablement Platform	Cybersecurity, IoT, Blockchain, Mobile App	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_557	Intelligent Public Infrastructure Monitoring and Citizen Service Framework	Cybersecurity, IoT, Web Technologies, Data Analytics	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_558	Climate Change Impact Assessment and Environmental Risk Prediction Platform	Big Data, IoT, AI, Data Analytics	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_559	AI-Driven Disaster Preparedness and Climate Resilience Management System	Machine Learning, Deep Learning, Blockchain, Mobile App	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_560	Carbon Emission Monitoring and Sustainability Analytics Framework	Deep Learning, Blockchain, Cloud Computing, Web Technologies	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_561	Environmental Monitoring and Ecological Conservation Decision Support System	Deep Learning, GIS, AI, Machine Learning	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_562	Blockchain-Based Public Service Delivery and Citizen Grievance Management System	Cloud Computing, Big Data, Data Analytics, Cybersecurity	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_563	AI-Enabled E-Governance Analytics and Administrative Decision Support Platform	Computer Vision, Web Technologies, Blockchain, Mobile App	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_564	Transparent Resource Allocation and Public Welfare Monitoring Framework	Cybersecurity, Machine Learning, AI, Cloud Computing	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_565	Digital Governance Performance Assessment and Policy Intelligence System	Computer Vision, Cloud Computing, AI, Mobile App	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_566	AI-Driven Precision Agriculture System for Crop Health Monitoring and Yield Optimization	Big Data, IoT, GIS, Blockchain	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_567	Smart Irrigation and Soil Nutrient Management Platform for Sustainable Farming	Cloud Computing, Cybersecurity, Deep Learning, IoT	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_568	Computer Vision Based Pest and Disease Detection System for Agricultural Crops	Cloud Computing, Computer Vision, Data Analytics, Web Technologies	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_569	Integrated Farm Resource Planning and Agricultural Decision Support System	Data Analytics, Web Technologies, Cybersecurity, Cloud Computing	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_570	AI-Powered Remote Patient Monitoring and Predictive Healthcare Analytics Platform	Deep Learning, GIS, Web Technologies, Blockchain	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_571	Smart Healthcare Management System for Rural and Underserved Communities	Cybersecurity, Blockchain, Data Analytics, GIS	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_572	Digital Disease Surveillance and Early Warning System for Public Health	IoT, Cybersecurity, Mobile App, Machine Learning	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_573	Intelligent Medical Diagnosis Assistance and Clinical Decision Support Platform	IoT, Big Data, Data Analytics, Web Technologies	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_574	Adaptive Learning and Personalized Student Performance Analytics Platform	IoT, Blockchain, AI, Deep Learning	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_575	AI-Based Skill Assessment and Career Guidance System for Students	AI, Big Data, Cloud Computing, Web Technologies	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_576	Smart Educational Resource Recommendation and Learning Management Platform	Machine Learning, Big Data, AI, IoT	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.

PRJ_577	Digital Academic Performance Monitoring and Institutional Analytics System	Web Technologies, Deep Learning, Cybersecurity, Cloud Computing	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_578	Real-Time Women Safety Monitoring and Emergency Response Coordination Platform	GIS, Web Technologies, Deep Learning, Computer Vision	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_579	AI-Enabled Personal Security and Threat Detection System for Women	Computer Vision, Mobile App, Blockchain, AI	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_580	Smart Community-Based Women Protection and Incident Reporting Platform	Machine Learning, Cloud Computing, Mobile App, Deep Learning	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_581	Geo-Fenced Emergency Alert and Safety Assistance System for Women	AI, Mobile App, Blockchain, GIS	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_582	Intelligent Water Quality Monitoring and Contamination Prediction System	Mobile App, Machine Learning, Blockchain, Big Data	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_583	Smart Water Resource Management and Distribution Optimization Platform	Deep Learning, Mobile App, Cloud Computing, GIS	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_584	IoT-Based Drinking Water Safety Assessment and Monitoring Framework	AI, GIS, Deep Learning, Blockchain	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_585	Integrated Watershed Monitoring and Sustainable Water Conservation System	GIS, Cloud Computing, Data Analytics, Web Technologies	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_586	AI-Based Smart Energy Consumption Monitoring and Optimization Platform	Mobile App, IoT, Blockchain, Cloud Computing	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_587	Renewable Energy Generation Forecasting and Grid Management System	AI, IoT, Data Analytics, Cloud Computing	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_588	Intelligent Energy Efficiency Assessment and Carbon Reduction Framework	Deep Learning, Big Data, Blockchain, Web Technologies	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_589	Smart Power Distribution Monitoring and Predictive Maintenance Platform	Blockchain, Computer Vision, IoT, Cybersecurity	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_590	Integrated Smart City Infrastructure Monitoring and Urban Analytics Platform	Big Data, GIS, Blockchain, Deep Learning	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_591	AI-Powered Urban Traffic Management and Mobility Optimization System	Data Analytics, Mobile App, GIS, Cybersecurity	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_592	Smart Waste Management and Circular Economy Enablement Platform	Cybersecurity, Big Data, Mobile App, Web Technologies	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_593	Intelligent Public Infrastructure Monitoring and Citizen Service Framework	Mobile App, Cybersecurity, GIS, IoT	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_594	Climate Change Impact Assessment and Environmental Risk Prediction Platform	IoT, Deep Learning, GIS, Mobile App	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_595	AI-Driven Disaster Preparedness and Climate Resilience Management System	Mobile App, Data Analytics, Machine Learning, Blockchain	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_596	Carbon Emission Monitoring and Sustainability Analytics Framework	Data Analytics, Computer Vision, IoT, GIS	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_597	Environmental Monitoring and Ecological Conservation Decision Support System	IoT, Computer Vision, Machine Learning, Data Analytics	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_598	Blockchain-Based Public Service Delivery and Citizen Grievance Management System	Mobile App, Web Technologies, Machine Learning, AI	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_599	AI-Enabled E-Governance Analytics and Administrative Decision Support Platform	Cybersecurity, Machine Learning, Computer Vision, Data Analytics	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_600	Transparent Resource Allocation and Public Welfare Monitoring Framework	Data Analytics, IoT, Cybersecurity, Big Data	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_601	Digital Governance Performance Assessment and Policy Intelligence System	AI, Machine Learning, Big Data, Mobile App	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_602	AI-Driven Precision Agriculture System for Crop Health Monitoring and Yield Optimization	Machine Learning, Blockchain, IoT, Big Data	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_603	Smart Irrigation and Soil Nutrient Management Platform for Sustainable Farming	Cybersecurity, GIS, Machine Learning, Blockchain	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_604	Computer Vision Based Pest and Disease Detection System for Agricultural Crops	AI, GIS, Data Analytics, Cybersecurity	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_605	Integrated Farm Resource Planning and Agricultural Decision Support System	Web Technologies, Computer Vision, Cloud Computing, GIS	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_606	AI-Powered Remote Patient Monitoring and Predictive Healthcare Analytics Platform	GIS, Cybersecurity, Data Analytics, Machine Learning	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_607	Smart Healthcare Management System for Rural and Underserved Communities	Web Technologies, Computer Vision, Blockchain, IoT	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_608	Digital Disease Surveillance and Early Warning System for Public Health	AI, Cloud Computing, GIS, IoT	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_609	Intelligent Medical Diagnosis Assistance and Clinical Decision Support Platform	Computer Vision, Mobile App, Web Technologies, Machine Learning	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_610	Adaptive Learning and Personalized Student Performance Analytics Platform	Big Data, Mobile App, Computer Vision, Deep Learning	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_611	AI-Based Skill Assessment and Career Guidance System for Students	Computer Vision, AI, Mobile App, Web Technologies	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_612	Smart Educational Resource Recommendation and Learning Management Platform	Cloud Computing, Mobile App, Blockchain, Cybersecurity	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_613	Digital Academic Performance Monitoring and Institutional Analytics System	Big Data, Cloud Computing, AI, Data Analytics	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_614	Real-Time Women Safety Monitoring and Emergency Response Coordination Platform	AI, Cybersecurity, Big Data, Cloud Computing	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_615	AI-Enabled Personal Security and Threat Detection System for Women	Cloud Computing, Cybersecurity, Data Analytics, Deep Learning	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.

PRJ_616	Smart Community-Based Women Protection and Incident Reporting Platform	IoT, Mobile App, Computer Vision, Big Data	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_617	Geo-Fenced Emergency Alert and Safety Assistance System for Women	Machine Learning, Web Technologies, Blockchain, IoT	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_618	Intelligent Water Quality Monitoring and Contamination Prediction System	GIS, Deep Learning, IoT, AI	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_619	Smart Water Resource Management and Distribution Optimization Platform	IoT, GIS, Machine Learning, AI	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_620	IoT-Based Drinking Water Safety Assessment and Monitoring Framework	Mobile App, Big Data, Cloud Computing, Web Technologies	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_621	Integrated Watershed Monitoring and Sustainable Water Conservation System	AI, Machine Learning, Data Analytics, Cybersecurity	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_622	AI-Based Smart Energy Consumption Monitoring and Optimization Platform	Machine Learning, Blockchain, AI, Deep Learning	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_623	Renewable Energy Generation Forecasting and Grid Management System	Cloud Computing, Deep Learning, Blockchain, Data Analytics	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_624	Intelligent Energy Efficiency Assessment and Carbon Reduction Framework	Web Technologies, Blockchain, Big Data, Cybersecurity	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_625	Smart Power Distribution Monitoring and Predictive Maintenance Platform	Web Technologies, Deep Learning, AI, IoT	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_626	Integrated Smart City Infrastructure Monitoring and Urban Analytics Platform	Data Analytics, Cybersecurity, Computer Vision, Blockchain	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_627	AI-Powered Urban Traffic Management and Mobility Optimization System	Computer Vision, Deep Learning, Big Data, IoT	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_628	Smart Waste Management and Circular Economy Enablement Platform	Cybersecurity, Deep Learning, Data Analytics, Machine Learning	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_629	Intelligent Public Infrastructure Monitoring and Citizen Service Framework	Blockchain, Deep Learning, Cybersecurity, Mobile App	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_630	Climate Change Impact Assessment and Environmental Risk Prediction Platform	Cloud Computing, Data Analytics, Blockchain, Deep Learning	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_631	AI-Driven Disaster Preparedness and Climate Resilience Management System	GIS, Data Analytics, Cloud Computing, Deep Learning	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_632	Carbon Emission Monitoring and Sustainability Analytics Framework	Machine Learning, Deep Learning, Mobile App, Computer Vision	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_633	Environmental Monitoring and Ecological Conservation Decision Support System	Cloud Computing, Cybersecurity, AI, Data Analytics	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_634	Blockchain-Based Public Service Delivery and Citizen Grievance Management System	Data Analytics, AI, Cybersecurity, Deep Learning	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_635	AI-Enabled E-Governance Analytics and Administrative Decision Support Platform	Cybersecurity, GIS, Deep Learning, Blockchain	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_636	Transparent Resource Allocation and Public Welfare Monitoring Framework	Web Technologies, Machine Learning, Cloud Computing, Big Data	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_637	Digital Governance Performance Assessment and Policy Intelligence System	Computer Vision, AI, Data Analytics, Big Data	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_638	AI-Driven Precision Agriculture System for Crop Health Monitoring and Yield Optimization	Deep Learning, IoT, GIS, Data Analytics	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_639	Smart Irrigation and Soil Nutrient Management Platform for Sustainable Farming	Big Data, Mobile App, Web Technologies, Data Analytics	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_640	Computer Vision Based Pest and Disease Detection System for Agricultural Crops	Data Analytics, AI, Big Data, Blockchain	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_641	Integrated Farm Resource Planning and Agricultural Decision Support System	Deep Learning, GIS, Big Data, Computer Vision	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_642	AI-Powered Remote Patient Monitoring and Predictive Healthcare Analytics Platform	Blockchain, GIS, Cloud Computing, AI	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_643	Smart Healthcare Management System for Rural and Underserved Communities	Computer Vision, Blockchain, Data Analytics, Cybersecurity	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_644	Digital Disease Surveillance and Early Warning System for Public Health	Cybersecurity, Data Analytics, Deep Learning, Computer Vision	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_645	Intelligent Medical Diagnosis Assistance and Clinical Decision Support Platform	Big Data, AI, Mobile App, IoT	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_646	Adaptive Learning and Personalized Student Performance Analytics Platform	Blockchain, Web Technologies, Mobile App, Deep Learning	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_647	AI-Based Skill Assessment and Career Guidance System for Students	Blockchain, Big Data, Cybersecurity, Computer Vision	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_648	Smart Educational Resource Recommendation and Learning Management Platform	Machine Learning, Data Analytics, AI, Computer Vision	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_649	Digital Academic Performance Monitoring and Institutional Analytics System	IoT, Big Data, GIS, Blockchain	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_650	Real-Time Women Safety Monitoring and Emergency Response Coordination Platform	Web Technologies, Cybersecurity, Computer Vision, Big Data	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_651	AI-Enabled Personal Security and Threat Detection System for Women	AI, IoT, Machine Learning, Web Technologies	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_652	Smart Community-Based Women Protection and Incident Reporting Platform	Big Data, Web Technologies, Machine Learning, Cybersecurity	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_653	Geo-Fenced Emergency Alert and Safety Assistance System for Women	Data Analytics, Web Technologies, Cybersecurity, Big Data	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_654	Intelligent Water Quality Monitoring and Contamination Prediction System	Computer Vision, Big Data, AI, GIS	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.

PRJ_655	Smart Water Resource Management and Distribution Optimization Platform	Big Data, Data Analytics, Machine Learning, Web Technologies	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_656	IoT-Based Drinking Water Safety Assessment and Monitoring Framework	Cybersecurity, AI, Deep Learning, Cloud Computing	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_657	Integrated Watershed Monitoring and Sustainable Water Conservation System	GIS, Mobile App, Blockchain, Cloud Computing	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_658	AI-Based Smart Energy Consumption Monitoring and Optimization Platform	GIS, Machine Learning, Big Data, Cybersecurity	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_659	Renewable Energy Generation Forecasting and Grid Management System	GIS, Machine Learning, Mobile App, Data Analytics	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_660	Intelligent Energy Efficiency Assessment and Carbon Reduction Framework	Cybersecurity, Big Data, IoT, Mobile App	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_661	Smart Power Distribution Monitoring and Predictive Maintenance Platform	GIS, Machine Learning, Cloud Computing, IoT	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_662	Integrated Smart City Infrastructure Monitoring and Urban Analytics Platform	Mobile App, Cybersecurity, Big Data, Machine Learning	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_663	AI-Powered Urban Traffic Management and Mobility Optimization System	Web Technologies, GIS, Blockchain, Cybersecurity	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_664	Smart Waste Management and Circular Economy Enablement Platform	Computer Vision, Cybersecurity, Big Data, Machine Learning	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_665	Intelligent Public Infrastructure Monitoring and Citizen Service Framework	Web Technologies, Mobile App, Data Analytics, Deep Learning	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_666	Climate Change Impact Assessment and Environmental Risk Prediction Platform	Big Data, AI, Cybersecurity, Cloud Computing	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_667	AI-Driven Disaster Preparedness and Climate Resilience Management System	Cybersecurity, AI, Cloud Computing, Data Analytics	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_668	Carbon Emission Monitoring and Sustainability Analytics Framework	Data Analytics, Machine Learning, Blockchain, IoT	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_669	Environmental Monitoring and Ecological Conservation Decision Support System	Big Data, AI, Blockchain, Cybersecurity	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_670	Blockchain-Based Public Service Delivery and Citizen Grievance Management System	Big Data, Deep Learning, Computer Vision, IoT	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_671	AI-Enabled E-Governance Analytics and Administrative Decision Support Platform	Blockchain, Data Analytics, Machine Learning, Mobile App	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_672	Transparent Resource Allocation and Public Welfare Monitoring Framework	Data Analytics, Cloud Computing, IoT, Cybersecurity	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_673	Digital Governance Performance Assessment and Policy Intelligence System	Computer Vision, Web Technologies, AI, Deep Learning	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_674	AI-Driven Precision Agriculture System for Crop Health Monitoring and Yield Optimization	Computer Vision, Web Technologies, Cybersecurity, IoT	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_675	Smart Irrigation and Soil Nutrient Management Platform for Sustainable Farming	Data Analytics, Machine Learning, GIS, Deep Learning	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_676	Computer Vision Based Pest and Disease Detection System for Agricultural Crops	Deep Learning, Big Data, Machine Learning, Cloud Computing	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_677	Integrated Farm Resource Planning and Agricultural Decision Support System	GIS, Data Analytics, Web Technologies, IoT	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_678	AI-Powered Remote Patient Monitoring and Predictive Healthcare Analytics Platform	AI, Mobile App, Deep Learning, Data Analytics	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_679	Smart Healthcare Management System for Rural and Underserved Communities	Data Analytics, IoT, Web Technologies, Blockchain	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_680	Digital Disease Surveillance and Early Warning System for Public Health	Cybersecurity, Cloud Computing, Deep Learning, Blockchain	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_681	Intelligent Medical Diagnosis Assistance and Clinical Decision Support Platform	Big Data, Mobile App, Web Technologies, Machine Learning	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_682	Adaptive Learning and Personalized Student Performance Analytics Platform	Data Analytics, Cloud Computing, Big Data, AI	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_683	AI-Based Skill Assessment and Career Guidance System for Students	GIS, Data Analytics, IoT, Blockchain	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_684	Smart Educational Resource Recommendation and Learning Management Platform	Computer Vision, Cloud Computing, IoT, Mobile App	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_685	Digital Academic Performance Monitoring and Institutional Analytics System	Cybersecurity, Machine Learning, Mobile App, Cloud Computing	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_686	Real-Time Women Safety Monitoring and Emergency Response Coordination Platform	IoT, Blockchain, Web Technologies, Cloud Computing	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_687	AI-Enabled Personal Security and Threat Detection System for Women	Data Analytics, Blockchain, Big Data, Mobile App	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_688	Smart Community-Based Women Protection and Incident Reporting Platform	Deep Learning, Machine Learning, Cloud Computing, Computer Vision	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_689	Geo-Fenced Emergency Alert and Safety Assistance System for Women	Web Technologies, Cloud Computing, Deep Learning, GIS	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_690	Intelligent Water Quality Monitoring and Contamination Prediction System	Deep Learning, AI, Cybersecurity, GIS	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_691	Smart Water Resource Management and Distribution Optimization Platform	Machine Learning, Web Technologies, Computer Vision, Cloud Computing	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_692	IoT-Based Drinking Water Safety Assessment and Monitoring Framework	Cybersecurity, Data Analytics, GIS, Cloud Computing	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_693	Integrated Watershed Monitoring and Sustainable Water Conservation System	Web Technologies, Blockchain, Cybersecurity, Mobile App	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.

PRJ_694	AI-Based Smart Energy Consumption Monitoring and Optimization Platform	Data Analytics, Web Technologies, Blockchain, IoT	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_695	Renewable Energy Generation Forecasting and Grid Management System	IoT, Blockchain, Cybersecurity, Big Data	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_696	Intelligent Energy Efficiency Assessment and Carbon Reduction Framework	Deep Learning, Big Data, Data Analytics, Machine Learning	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_697	Smart Power Distribution Monitoring and Predictive Maintenance Platform	Blockchain, Mobile App, Cloud Computing, AI	SDG 7	This project focuses on developing an innovative energy solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_698	Integrated Smart City Infrastructure Monitoring and Urban Analytics Platform	Computer Vision, AI, Deep Learning, Data Analytics	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_699	AI-Powered Urban Traffic Management and Mobility Optimization System	GIS, AI, Cybersecurity, Mobile App	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_700	Smart Waste Management and Circular Economy Enablement Platform	IoT, AI, Data Analytics, Blockchain	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_701	Intelligent Public Infrastructure Monitoring and Citizen Service Framework	Data Analytics, Cloud Computing, GIS, Mobile App	SDG 11	This project focuses on developing an innovative smart cities solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_702	Climate Change Impact Assessment and Environmental Risk Prediction Platform	Computer Vision, GIS, Web Technologies, AI	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_703	AI-Driven Disaster Preparedness and Climate Resilience Management System	Web Technologies, Cybersecurity, Machine Learning, Cloud Computing	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_704	Carbon Emission Monitoring and Sustainability Analytics Framework	Cloud Computing, Machine Learning, IoT, Computer Vision	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_705	Environmental Monitoring and Ecological Conservation Decision Support System	IoT, AI, Cloud Computing, Deep Learning	SDG 13	This project focuses on developing an innovative climate solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_706	Blockchain-Based Public Service Delivery and Citizen Grievance Management System	Deep Learning, IoT, Machine Learning, Cybersecurity	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_707	AI-Enabled E-Governance Analytics and Administrative Decision Support Platform	Machine Learning, IoT, Blockchain, AI	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_708	Transparent Resource Allocation and Public Welfare Monitoring Framework	Machine Learning, Web Technologies, GIS, Cybersecurity	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_709	Digital Governance Performance Assessment and Policy Intelligence System	Data Analytics, GIS, Machine Learning, AI	SDG 16	This project focuses on developing an innovative governance solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_710	AI-Driven Precision Agriculture System for Crop Health Monitoring and Yield Optimization	Big Data, IoT, Cloud Computing, Mobile App	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_711	Smart Irrigation and Soil Nutrient Management Platform for Sustainable Farming	Cloud Computing, Cybersecurity, Machine Learning, GIS	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_712	Computer Vision Based Pest and Disease Detection System for Agricultural Crops	Mobile App, AI, Deep Learning, Cloud Computing	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_713	Integrated Farm Resource Planning and Agricultural Decision Support System	GIS, Deep Learning, Big Data, Web Technologies	SDG 2	This project focuses on developing an innovative agriculture solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_714	AI-Powered Remote Patient Monitoring and Predictive Healthcare Analytics Platform	AI, IoT, Cybersecurity, Cloud Computing	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_715	Smart Healthcare Management System for Rural and Underserved Communities	Cloud Computing, Mobile App, Machine Learning, GIS	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_716	Digital Disease Surveillance and Early Warning System for Public Health	Cloud Computing, GIS, Deep Learning, Web Technologies	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_717	Intelligent Medical Diagnosis Assistance and Clinical Decision Support Platform	Mobile App, Web Technologies, Machine Learning, Cloud Computing	SDG 3	This project focuses on developing an innovative healthcare solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_718	Adaptive Learning and Personalized Student Performance Analytics Platform	AI, GIS, Cybersecurity, Deep Learning	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_719	AI-Based Skill Assessment and Career Guidance System for Students	IoT, Data Analytics, GIS, Blockchain	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_720	Smart Educational Resource Recommendation and Learning Management Platform	AI, Mobile App, Computer Vision, Deep Learning	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_721	Digital Academic Performance Monitoring and Institutional Analytics System	GIS, Machine Learning, AI, Data Analytics	SDG 4	This project focuses on developing an innovative education solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_722	Real-Time Women Safety Monitoring and Emergency Response Coordination Platform	Deep Learning, Data Analytics, Computer Vision, Cloud Computing	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_723	AI-Enabled Personal Security and Threat Detection System for Women	Cybersecurity, Blockchain, Computer Vision, IoT	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_724	Smart Community-Based Women Protection and Incident Reporting Platform	AI, Big Data, Web Technologies, Mobile App	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_725	Geo-Fenced Emergency Alert and Safety Assistance System for Women	IoT, Cybersecurity, Deep Learning, Blockchain	SDG 5	This project focuses on developing an innovative women safety solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_726	Intelligent Water Quality Monitoring and Contamination Prediction System	Mobile App, Cloud Computing, AI, Machine Learning	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_727	Smart Water Resource Management and Distribution Optimization Platform	Machine Learning, Big Data, Web Technologies, Mobile App	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_728	IoT-Based Drinking Water Safety Assessment and Monitoring Framework	Web Technologies, IoT, Mobile App, Big Data	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
PRJ_729	Integrated Watershed Monitoring and Sustainable Water Conservation System	Data Analytics, GIS, Blockchain, AI	SDG 6	This project focuses on developing an innovative water solution that leverages modern digital technologies to improve operational efficiency, enhance decision-making capabilities, and support sustainable development goals.
